**Muddling Toward Frugality** Warren Johnson, 2010-07 Mr Johnson's thesis can be summarized without much difficulty after generations of extravagant and reckless industrial expansion we are clearly entering an age of economic scarcity While human demands continue to rise natural resources especially the non renewable kind become harder to find and more expensive to extract process transport and distribute This simple brute fact is the basic cause of inflation despite the inability of most professional economists to see it The dismal science has never been more dismally obtuse than it is today The law of diminishing returns is coming into effect Technological developments can delay the process but not halt or reverse it nor can we rely on government or big business to save us Planning for further growth delays the adjustments that must be made makes a fair sharing of necessary sacrifices more troublesome and if carried too far will make more severe and painful because rapid the inevitable decline of the international economic machine The best way to deal with the end of affluence is to accept it not fight it and to begin here and now the unavoidable adaptations on an individual family and community basis Piecemeal experimental and muddling

**Muddling Toward Frugality** Warren A. Johnson, 1979 Foresees the social and economic benefits of the energy crisis as Americans are forced to alter lifestyles increase self sufficiency and strengthen communities when geographic mobility is reduced

**The Dance with Community** Robert Booth Fowler, 1991-07-25 Contemporary intellectuals have rushed to embrace the concept of community What does this tell us about American political thought Why are intellectuals uneasy with modern liberal individualism and its institutional policy results Why is political intellectual discourse dominated today by complaint In The Dance with Community Robert Booth Fowler reflects upon these and related questions My goal he writes is to present contemporary political thought about community for what it is a conversation interactive spirited and sometimes tough There have been many interpretations of the much discussed decline in community spirit Rather than offer another Fowler steps back to look

at the debate itself He examines from the perspective of an intellectual historian the attention to community in current American political thought and explores the setting of that attention He also identifies five alternative models of community integral to the current debates and sketches a clear image of each its relationship to others the logic of its appeal and its emphases and problems In each instance he places the model into the larger conversation over alternative communities and the value of community itself

**The Ecotechnic Future** John Michael Greer,2009-10-01 How to survive and thrive in the post industrial age In response to the coming impact of peak oil John Michael Greer helps us envision the transition from an industrial society to a sustainable ecotechnic world not returning to the past but creating a society that supports relatively advanced technology on a sustainable resource base Fusing human ecology and history this book challenges assumptions held by mainstream and alternative thinkers about the evolution of human societies Human societies like ecosystems evolve in complex and unpredictable ways making it futile to try to impose rigid ideological forms on the patterns of evolutionary change Instead social change must explore many pathways over which we have no control The troubling and exhilarating prospect of an open ended future he proposes requires dissensus a deliberate acceptance of radical diversity that widens the range of potential approaches to infinity Written in three parts the book places the present crisis of the industrial world in its historical and ecological context in part one part two explores the toolkit for Ecotechnic Age and part three opens a door to the complexity of future visions For anyone concerned about peak oil and the future of the industrial society this book provides a solid analysis of how we got to where we are and a practical toolkit to prepare for the future

**The Making of Federal Coal Policy** Robert Henry Nelson,1983 The Making of Federal Coal Policy provides a unique record of as well as important future perspectives on one of the most significant ideological conflicts in national policymaking in the last decade The management of federally owned coal almost one third of the U S s total coal resources has furnished an arena for the contest between energy development and environmental protection as well as between the federal government and the states Robert H Nelson has written an important historical document and a useful guide for policy analysts

**The Grocery Store Game** Janine Bolon,2007-03-01 This is the book that supplements Money It s Not Just for Rich People Here is the description of the method used by my family that saved us thousands of dollars a year on our food bill This workbook has forms at the back so you can create your own price book

**Ecophilosophy** Donald Edward Davis,1989 **A Dictionary of Green Ideas** John Button,2019-06-21 First published in 1988 A Dictionary of Green Ideas collects together the concepts which go to make up a green view of the world Ecology and the environment conservation and appropriate technology politics and philosophy peace and health spirituality and world development all these areas and more are reflected in nearly 1500 entries The entries range from the very short to full length essays reflecting the diversity of the subject matter All give a clear definition of the meaning of the term and an indication of its etymology and earliest use But the Dictionary of Green Ideas is much more than simply a list of definitions The concepts discussed are elaborated upon interpreted set in context exemplified by quotations

from a wide range of sources and related to other entries by means of an extensive network of cross references The result is a fascinating and immensely readable book which successfully fulfils a double role as an accessible introduction to green thought and as a source of reference offering new insights to green thinkers of long standing **A Whole Which Is Greater**

Paul Gilk,David Kast,2012-12-07 In November 2010 Republican Scott Walker was elected Governor of Wisconsin In something of a Tea Party sweep the iconic Russ Feingold lost his seat in the U S Senate and the Wisconsin legislature became Republican in both chambers In early 2011 Governor Walker announced a budget repair bill that among other things gutted collective bargaining rights for most public sector unions Outraged citizens occupied the state capitol for weeks in an outpouring of opposition the likes of which had not been seen in Wisconsin since the protests against the war in Vietnam in the 1960s Various recall elections were held in the summer of 2011 all in regard to the state senate with another set of elections in June 2012 among them the governor s recall was paramount Democrats regained control of the senate but Scott Walker defeated Milwaukee mayor Tom Barrett and kept the governor s mansion Many Democrats were stunned by the failed recall These essays probe that failure Every contributor has a unique perspective but lurking near the core of that probing are two key issues the extent to which corporations have taken over government and whether ecological crises are revealing conventional politics as complicit in disaster **The Localization Reader**

Raymond De Young,Thomas Princen,2012-02-10 Readings that point the way to a peaceful democratic and ecologically resilient transition to an era of localization limits and societal opportunities Energy supplies are tightening Persistent pollutants are accumulating Food security is declining There is no going back to the days of reckless consumption but there is a possibility already being realized in communities across North America and around the world of localizing of living well as we learn to live well within immutable constraints This book maps the transition to a more localized world Society is shifting from the centrifugal forces of globalization cheap and abundant raw materials and energy intensive commercialization concentrated economic and political power to the centripetal forces of localization distributed authority and leadership sustainable use of nearby natural resources community self reliance and cohesion with crucial regional national and international dimensions This collection offering classic texts by such writers as Wendell Berry M King Hubbert and Ernst F Schumacher as well as new work by authors including Karen Litfin and David Hess shows how localization a process of affirmative social change can enable psychologically meaningful and fulfilling lives while promoting ecological and social sustainability Topics range from energy dynamics to philosophies of limits from the governance of place based communities to the discovery of positive personal engagement Together they point the way to a transition that can be peaceful democratic just and environmentally resilient **The Coevolution Quarterly**
