Multidisciplinary Approaches To Language Production:

Multidisciplinary Approaches to Language Production Thomas Pechmann, Christopher Habel, 2011-06-03 This volume comprises contributions from different disciplines cognitive psychology linguistics computer science neuroscience concerned with the generation of natural speech It summarizes the outcome of a six year long priority program funded by the German Research Foundation DFG that aimed at bringing together colleagues with different viewpoints but sharing a principal interest in the cognitive processes underlying language production The result is a state of the art discussion of one of the most fascinating branches of human behavior taking into account a particularly rich multidisciplinary empirical data base

Language Origin: A Multidisciplinary Approach Jan Wind, Brunetto Chiarelli, Bernard Bichakjian, Alberto Nocentini, Abraham Jonker, 2013-03-09 Language Origin A Multidisciplinary Approach presents a synthesis of viewpoints and data on linguistic psychological anatomical and behavioral studies on living species of Primates and provides a comparative framework for the evaluation of paleoanthropological studies This double endeavor makes it possible to direct new research on the nature and evolution of human language and cognition The book is directed to students of linguistics biology anthropology anatomy physiology neurology psychology archeology paleontology and other related fields A better understanding of speech pathology may stem from a better understanding of the relationship of human communication to the evolution of our species The book is conceived as a timely contribution to such knowledge since it allows for the first time a systematic assessment of the origins of human language from a comprehensive array of scientific viewpoints

Multidisciplinary Approaches to Code Switching Ludmila Isurin, Donald Winford, Kees De Bot, 2009 The volume presents a selection of contributions by leading scholars in the field of code switching In the past the phenomenon of code switching was studied within different subfields of linguistics and they all took their own perspectives on code switching without taking into account findings from other subdisciplines This book raises a question of a much broader multidisciplinary approach to studying the phenomenon of code switching calls for integration of disciplines and illustrates how frameworks from one subfield can be applied to models in another The volume includes survey chapters empirical studies contributions that use empirical data to test new hypotheses about code switching or suggest new approaches and models for the study of code switching and chapters that discuss principles and constraints of code switching and code switching vs transfer The book is easily accessible to anyone who is interested in the phenomenon of code switching in bilinguals

Research Methods in Sign Language Studies Eleni Orfanidou, Bencie Woll, Gary Morgan, 2015-03-16 Research Methods in Sign Language Studies is a landmark work on sign language research which spans the fields of linguistics experimental and developmental psychology brain research and language assessment Examines a broad range of topics including ethical and political issues key methodologies and the collection of linguistic cognitive neuroscientific and neuropsychological data Provides tips and recommendations to improve research quality at all levels and encourages readers to approach the field from the perspective

of diversity rather than disability Incorporates research on sign languages from Europe Asia North and South America and Africa Brings together top researchers on the subject from around the world including many who are themselves deaf

Sign Language Roland Pfau, Markus Steinbach, Bencie Woll, 2012-08-31 Sign language linguists show here that all questions relevant to the linguistic investigation of spoken languages can be asked about sign languages Conversely questions that sign language linguists consider even if spoken language researchers have not asked them yet should also be asked of spoken languages The HSK handbook Sign Language aims to provide a concise and comprehensive overview of the state of the art in sign language linguistics It includes 44 chapters written by leading researchers in the field that address issues in language typology sign language grammar psycholinguistics neurolinguistics sociolinguistics and language documentation and transcription Crucially all topics are presented in a way that makes them accessible to linguists who are not familiar with sign language linguistics Language George Melville Bolling, Bernard Bloch, 2010 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin *Code-switching Between Structural and Sociolinguistic Perspectives* Gerald Stell, Kofi Yakpo, 2015-02-17 The study of code switching has been carried out from linguistic psycholinguistic and sociolinguistic perspectives largely in isolation from each other This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence forms and outcomes of code switching The contributions in this volume are divided into three parts code switching between cognition and socio pragmatics multilingual interaction and identity and code switching and social structure The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations They are predictive and descriptive in their research goals and rely on experimental or naturalistic data But they share the common goal of seeking to explain how social structures ideologies and identity impact on the grammatical and conversational features of code switching and language mixing and on the emergence of mixed languages Given its scope this volume is a significant addition to the empirical and theoretical foundations of the study of code switching It is also of relevance to the general debate on the inter relationships between language and society **Individual Differences in Second/Foreign Language Speech**

Production: Multidisciplinary Approaches and New Sounds Peijian Paul Sun, Boping Yuan, Xun Yan, Jimin Kahng, 2023-09-01 Second foreign language L2 speech production is a complex process requiring individuals combined efforts to utilize various processing components such as conceptualiser formulator and articulator Since the publication of Pim Levelt's book *Speaking From Intention to Articulation* in 1989 a considerable number of studies have examined L2 speech production in the field of neuroscience with a particular focus on the link between speech perception and speech production Undeniably a neurolinguistic examination of speech production can enrich our understanding of how human brains compute linguistic information at a cognitive level However it is insufficient by only focusing on the neurocognitive dimension of speech production given that individuals speech production can be subject to various individual differences

factors either cognitively affectively or socio culturally It is therefore necessary to move beyond the neurocognitive understanding of speech production by taking every possible perspective into consideration Individual difference as an umbrella term covers psychological traits personal characteristics cognitive and emotional components that distinguish learners from each other Given that individual difference factors can reveal disparities in L2 learning and performance among learners such factors have attracted researchers growing interest concerning their influences on L2 speech processing their relationships with L2 speech performance and their contributions to L2 speech development Nevertheless our understanding of L2 speech production is not only insufficient compared to other L2 skills such as writing and reading but also limited to the neurocognitive account of L2 speech production More research therefore is in urgent need to uncover the influence of various individual differences factors on L2 speech production from multidisciplinary perspectives

Speech Perception, Production and Acquisition Huei-Mei Liu, Feng-Ming Tsao, Ping Li, 2020-09-14 This book addresses important issues of speech processing and language learning in Chinese It highlights perception and production of speech in healthy and clinical populations and in children and adults This book provides diverse perspectives and reviews of cutting edge research in past decades on how Chinese speech is processed and learned Along with each chapter future research directions have been discussed With these unique features and the broad coverage of topics this book appeals to not only scholars and students who study speech perception in preverbal infants and in children and adults learning Chinese but also to teachers with interests in pedagogical applications in teaching Chinese as Second Language *The Grammar of*

Multilingualism Artemis Alexiadou, Terje Lohndal, 2016-10-31 This volume investigates the nature of grammatical representations in speakers who master multiple languages Since the early days of modern formal approaches to grammar most work has been based on the language of monolingual humans Less work has been conducted based on data from speakers who possess more than one language Although important insights have been gained from a monolingual focus there is every reason to believe that bi and multilingual data can inform linguistic theory A lot of ongoing work demonstrates that this is indeed the case and the current volume contributes to this growing literature Thus the research topic addresses a number of questions relating to grammatical structures in multilingual speakers as well as the methodological issues that arise in the context of studying such speakers A better understanding of the grammatical sides of multilingualism is crucial for understanding the human language capacity and in turn for offering better advice to the public concerning issues of language choice for multilingual children and adults education and language deficits in multilingual individuals *Focus on French as a Foreign Language* Jean-Marc Dewaele, 2005 This book offers sharp new insights into the acquisition and use of
