Phenomenologies of the City Studies in the History and Philosophy of Architecture brings architecture and urbanism into dialogue with phenomenology Phenomenology has informed debate about the city from social sciences to cultural studies Within architecture however phenomenological inquiry has been neglecting the question of the city Addressing this lacuna this book suggests that the city presents not only the richest but also the politically most urgent horizon of reference for philosophical reflection on the cultural and ethical dimensions of architecture The contributors to this volume are architects and scholars of urbanism Some have backgrounds in literature history religious studies and art history The book features 16 chapters by younger scholars as well as established thinkers including Peter Carl David Leatherbarrow Alberto P rez Gomez Wendy Pullan and Dalibor Vesely Rather than developing a single theoretical statement the book addresses architecture s relationship with the city in a wide range of historical and contemporary contexts The chapters trace hidden genealogies and explore the ruptures as much as the persistence of recurrent cultural motifs Together these interconnected phenomenologies of the city raise simple but fundamental questions What is the city for how is it ordered and how can it be understood The book does not advocate a return to a naive sense of unity or order Rather it investigates how architecture can generate meaning and forge as well as contest social and cultural representations

*Avant-Garde World Creation* Abigael van Alst, 2025-10-30 This book explores the widespread fascination with world creation among early twentieth century artists and examines those trends within the European avant garde The book reflects on what the world looks and feels like before and after World War One and thus also concerns creativity and destruction alike in the context of modernity Over the course of three chapters the author focusses on works in which avant garde artists

combine and experiment with various arts and media to create alternative narratives of the world's creation. These works include three canonized total works of art: *Der Weltbaumeister* (The World's Master Builder, 1920), an illustrated book imagined as an architectural play by the Expressionist architect Bruno Taut; the Futurist opera *C Victory Over the Sun* (1913) by Aleksei Kruchenykh, Velimir Khlebnikov, Kazimir Malevich, and Mikhail Matiushin; and the Cubist ballet *La Création du monde* (The Creation of the World, 1923) by Blaise Cendrars, Fernand Léger, Darius Milhaud, and Jean Bérlioz. Providing new readings of these classic works that dive deeply into the avant-garde's inter-artistic search for new modes of mediation as well as its dialogue with science, politics, and technology, Abigail van Alst demonstrates how each of these artworks staged a cosmogony, an alternative story of the universe's creation which simultaneously experimentally and critically recounted the story of modernity. This new book is ideal for researchers and scholars in History of Art, Modernism, and Comparative Literature.
