Environmentally sustainable tourism or ecotourism has become a major area of interest for governments the private sector and international lending institutions It is regarded as a way of allowing economic development whilst protecting against environmental degradation especially in those countries with fragile ecosystems However despite the beneficial intentions of ecotourism it tends to be regarded uncritically by environmental organizations governments and the private sector alike Rosaleen Duffy presents this analysis of ecotourism linking it with environmental ideologies and the politics of North South relations By the extensive use of case study and interview material she formulates ideas and proposals that should be important for the development of ecotourism around the globe

An incredible true life adventure set on the most dangerous frontier of all outer spaceIn the nearly forty years since Neil Armstrong walked on the moon space travel has come to be seen as a routine enterprise at least until the shuttle Columbia disintegrated like the Challenger before it reminding us once again that the dangers are all too real *Too Far from Home* vividly captures the hazardous realities of space travel Every time an astronaut makes the trip into space he faces the possibility of death from the slightest mechanical error or instance of bad luck a cracked O ring an errant piece of space junk an oxygen leak There are a myriad of frighteningly probable events that would result in an astronaut s death In fact twenty one people who have attempted the journey have been killed Yet for a special breed of individual the call of space is worth the risk Men such as U S astronauts Donald Pettit and Kenneth Bowersox and Russian flight engineer Nikolai Budarin who in November 2002 left on what was to be a routine fourteen week mission maintaining the International Space Station But then on February 23 2003 the Columbia exploded beneath them Despite the numerous news reports examining the tragedy the

public remained largely unaware that three men remained orbiting the earth With the launch program suspended indefinitely these astronauts had suddenly lost their ride home Too Far from Home chronicles the efforts of the beleaguered Mission Controls in Houston and Moscow as they work frantically against the clock to bring their men safely back to Earth ultimately settling on a plan that felt at best like a long shot Latched to the side of the space station was a Russian built Soyuz TMA 1 capsule whose technology dated from the late 1960s in 1971 a malfunction in the Soyuz 11 capsule left three Russian astronauts dead Despite the inherent danger the Soyuz became the only hope to return Bowersox Budarin and Pettit home Chris Jones writes beautifully of the majesty and mystique of space travel while reminding us all how perilous it is to soar beyond the sky
