New Weapon Technologies:

Dehumanization of Warfare Wolff Heintschel von Heinegg, Robert Frau, Tassilo Singer, 2017-12-28 This book addresses the technological evolution of modern warfare due to unmanned systems and the growing capacity for cyberwarfare The increasing involvement of unmanned means and methods of warfare can lead to a total removal of humans from the navigation command and decision making processes in the control of unmanned systems and as such away from participation in hostilities the dehumanization of warfare This raises the question of whether and how today's law is suitable for governing the dehumanization of warfare effectively Which rules are relevant Do interpretations of relevant rules need to be reviewed or is further and adapted regulation necessary Moreover ethical reasoning and computer science developments also have to be taken into account in identifying problems Adopting an interdisciplinary approach the book focuses primarily on international humanitarian law with related ethics and computer science aspects included in the discussion and the analysis

New Weapon Technologies & the ABM Treaty Herbert Lin, 1988 The Anti Ballistic Missile ABM Treaty of 1972 is regarded as the most important arms control agreement currently in force between the United States and the Soviet Union Lin identifies the key technical issues being encountered by the ABM Treaty and shows how new weapon technologies not widely anticipated in 1972 may erode the treaty regime He focuses on emerging technologies such as lasers and particle beams and dual capable technologies that include antisatellite weapons anti tactical ballistic missiles and surface to air missiles He also suggests that both governments must address issues that can exploit weaknesses of the treaty in order to keep it alive ISBN 0 08 035964 7 pbk 9 90 Weapons Technology Sabine Lorca, AI, 2025-03-10 Weapons Technology explores the fascinating relationship between real world military technology and its depiction in manga The book examines how advancements in weapon systems from firearms to cyber warfare and drone technology are reimaged in popular manga series By analyzing the technological aspects of both the book reveals how manga often reflects and potentially shapes public perceptions of advanced military technology The book provides a historical and technological context for understanding weapon systems tracing their evolution and exploring the science behind them It analyzes specific manga series demonstrating how real world technologies like advanced armor systems and futuristic combat scenarios are adapted into fictional narratives This approach highlights the influence of actual military innovation on imaginative storytelling Organized into three parts the book first introduces fundamental concepts of weapons technology Next it presents manga case studies that examine how these technologies are incorporated and adapted Finally it synthesizes these observations to reveal broader patterns of influence and discusses the ethical implications making it valuable for anyone interested in the intersection of technology military history and culture Military Technology, Military Strategy and the Arms Race Marek Thee, 2025-03-03 First published in 1986 Military Technology Military Strategy and the Arms Race argues that a principal factor contributing to the arms race is the military research and development R and D sector It traces the arms race since

World War II and explores the relationship between the emergence of new weapon technology the development of new weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics *Weapons and the Law of Armed Conflict* William H. Boothby, 2016-03-10

Bringing together the law of armed conflict governing the use of weapons into a single volume the fully updated Second Edition of *Weapons and the Law of Armed Conflict* interprets these rules and discusses the factors influencing future developments in weapons law After relating the historical evolution of weapons law the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters Having stated the law as it is the book then explores the way in which this dynamic field of international law develops in the light of various influences The legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established Having stated the law as it is the book then investigates the way in which this dynamic field of international law develops in the light of various influences In the final chapter the prospects for future rule change are considered This Second Edition includes a discussion of new treaty law on expanding bullets the arms trade and norms in relation to biological and chemical weapons It also analyses the International Manuals on air and missile warfare law and on cyber warfare law the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications otherwise known as cyber activities *New Weapon Technologies and NATO* Robert Andrew Kromer, 1984 *Routledge Handbook of War, Law and Technology* James Gow, Ernst Dijxhoorn, Rachel Kerr, Guglielmo Verdirame, 2019-05-15 This volume provides an authoritative cutting edge resource on the characteristics of both technological and social change in warfare in the twenty first century and the challenges such change presents to international law The character of contemporary warfare has recently undergone significant transformation in several important respects the nature of the actors the changing technological capabilities available to them and the sites and spaces in which war is fought These changes have augmented the phenomenon of non obvious warfare making understanding warfare one of the key challenges Such developments have been accompanied by significant flux and uncertainty in the international legal sphere This handbook brings together a

unique blend of expertise combining scholars and practitioners in science and technology international law strategy and policy in order properly to understand and identify the chief characteristics and features of a range of innovative developments means and processes in the context of obvious and non obvious warfare The handbook has six thematic sections Law war and technology Cyber warfare Autonomy robotics and drones Synthetic biology New frontiers International perspectives This interdisciplinary blend and the novel rich and insightful contribution that it makes across various fields will make this volume a crucial research tool and guide for practitioners scholars and students of war studies security studies technology and design ethics international relations and international law

Weapons of War: Environmental Impact, 2013-08-15 The Indian Air Force from a humble beginning in 1932 with 4 Wapiti aircraft six Indian officers and 22 hawai sepoys have traversed a long journey of eighty one years and crossed noteworthy milestones to become the fourth largest air force in the world While facing several limitations challenges IAF have met all the national defence requirements and made several strategic contributions With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges India s national defence requirements are also increasing The first Gulf War was a monumental turning point in the war time employment of aerospace power Ever since significance of aerospace power in war crisis and peace time has been gaining ascendancy Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground Scrutiny of the emerging global and national trends suggests that employment of the aerospace assets as well as nation s expectation from the IAF will continue to rise Alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges IAF would be facing in the next two decades and beyond Road map for transformation of the national security framework indigenous aerospace industry and the IAF has also been suggested

Rumsfeld's Wars Dale Roy Herspring, 2008 A highly critical but nonpartisan assessment of the controversial former Defense Secretary as told by one of the leading experts on civil military relations Focuses on Rumsfeld s notoriously domineering leadership style flawed vision for transforming the military and failures in the Iraq War

Tactics and Technology Brian MacDonald, 1986 *World*, 1997

Medicine. Technology Howard Jason Rogers, 1906

New Technologies and the Law of Armed Conflict Hitoshi Nasu, Robert McLaughlin, 2013-12-23 Modern technological development has been both rapid and fundamentally transformative of the means and methods of warfare and of the broader environment in which warfare is conducted In many cases technological development has been stimulated by and dedicated to addressing military requirements On other occasions technological developments outside the military sphere affect or inform the conduct of warfare and military expectations The introduction of new technologies such as information technology space technologies nanotechnology and robotic technologies into our civil life and into warfare is

expected to influence the application and interpretation of the existing rules of the law of armed conflict In this book scholars and practitioners working in the fields critically examine the potential legal challenges arising from the use of new technologies and future directions of legal development in light of the specific characteristics and challenges each technology presents with regard to foreseeable humanitarian impacts upon the battlespace **Aviation Week & Space Technology**, 1916 Includes a mid December issue called Buyer guide edition **Secret Weapons and World War II** Walter E. Gruenden, 2005 Gruenden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East BOOK JACKET **Developments in Industrial Technology**, 1921 **Japan's Imperial Army** Edward J. Drea, 2009 The first comprehensive English language history of the Japanese imperial army based largely on Japanese language sources Traces the origins evolution and impact of the army as an engine of Japan s regional and global ambitions and as a catalyst for the militarization of its homeland **Man & Development**, 1981 *New Weapon Technologies*, 1976 **Mobilizing for Modern War** Paul A. C. Koistinen, 1997 In this volume Koistinen examines war planning and mobilizing in an era of rapid industrialization and reveals how economic mobilization for defense and war is shaped at the national level by the interaction of political economic and military institutions and by increasingly powerful and expensive weaponry
