Cultural Meanings of News Daniel A. Berkowitz, 2011 What is news Why does news turn out like it

does What factors influence the creation production and dissemination of news Cultural Meanings of News takes on these deceptively simple questions through an essential collection of seminal and contemporary studies by leaders in the fields of mass communication and media studies Similar in format and purpose to editor Dan Berkowitz s award winning Social Meanings of News this new volume represents a conceptual update a continuation of the discourse about the nature of news and how it comes to be moving ideas ahead from the earlier tradition of sociological approaches to the more pervasive cultural perspectives that inform understandings about news Cultural Meanings of News provides a carefully selected set of readings organized into thematic areas that each probe a dimension of the literature from sociological roots to cultural perspectives news as narrative and cultural text newswork as cultural ritual news as cultural myth news and its interpretive communities news as a source and reflection of collective memory toward the future of news research This text reader provides students and scholars with first hand exposure to cultural approaches to the study of news while also providing an organizing framework for understanding the commonalities and differences between threads in the research The goals are to engage readers through guided immersion in the material

### **Constructing Political Expertise in the News**

Kathleen Searles,Yanna Krupnikov,John Barry Ryan,Hillary Style,2023-02-23 Expert news sources offer context and act as translators communicating complex policy issues to the public Therefore these sources have implications for who and what is elevated and legitimized by news coverage This element considers patterns in expert sources focusing on a particular area of expertise politics As a starting point it conducts a content analysis tracking which types of political experts are most likely to be interviewed using this analysis to explain patterns in expert sourcing Building on the source data it next conducts experiments and surveys of journalists to consider demand for expert sources Finally shifting the analysis to the supply of expert sources it turns to a survey of faculty to track expert experiences with journalists Jointly the results suggest underlying patterns in expert sourcing is a tension between journalists preferences the time constraints of producing news and the preferences of the experts themselves

### Journalistic Stance in Chinese and Australian Hard News

Changpeng Huan,2018-07-03 Adopting a multi perspective ontological approach to language in social life this book investigates the concept of journalistic stance defining it as a nexus of social practice rather than simply linguistic realizations It focuses on the discursive aspect of journalistic stance in news texts to analyse the ways journalistic stances are enacted in Chinese and Australian print media hard news reporting Further using the appraisal framework it identifies stance markers in news texts and examines the social institutional and inter personal aspects of journalistic stance on the basis of insights gained from participant observation in news institutions in order to understand news production processes It also highlights the articulation of news values and the exercise of symbolic power in each news production context This book appeals to a wide range of researchers such as discourse analysts in the field of news discourse and other scholars whose research is relevant to stance evaluation and those engaged in corpus informed studies along with those in the field journalism and

communication     **Partisan Journalism** Jim A. Kuypers,2013-11-21 In Partisan Journalism A History of Media Bias in the United States Jim A Kuypers guides readers on a journey through American journalistic history focusing on the warring notions of objectivity and partisanship Kuypers shows how the American journalistic tradition grew from partisan roots and with only a brief period of objectivity in between has returned to those roots today The book begins with an overview of newspapers during Colonial times explaining how those papers openly operated in an expressly partisan way he then moves through the Jacksonian era s expansion of both the press and its partisan nature After detailing the role of the press during the War Between the States Kuypers demonstrates that it was the telegraph not professional sentiment that kicked off the movement toward objective news reporting The conflict between partisanship and professionalization objectivity continued through the muckraking years and through World War II with newspapers in the 1950s often being objective in their reporting even as their editorials leaned to the right This changed rapidly in the 1960s when newspaper editorials shifted from right to left and progressive advocacy began to slowly erode objective content Kuypers follows this trend through the early 1980s and then turns his attention to demonstrating how new communication technologies have changed the very nature of news writing and delivery In the final chapters covering the Bush and Obama presidencies he traces the growth of the progressive and partisan nature of the mainstream news while at the same time explores the rapid rise of alternative news sources some partisan some objective that are challenging the dominance of the mainstream press This book steps beyond a simple charge counter charge of political bias in the news in that it offers an argument that the press in America except for a brief period was essentially partisan from its inception and has returned with a vengeance to its original roots The final argument presented in the book is that this new development may actually be healthy for American Democracy

**Everyman News** Michele Weldon,2008 Examines how newspapers have changed over the past few years becoming story papers Comparing 850 stories story approaches and unofficial sourcing in twenty American newspapers from 2001 and 2004 Weldon reveals a shift toward features over hard news along with an increase in anecdotal or humanistic approaches to all stories Provided by publisher     **Fake News Is Bad News** Ján Višňovský,Jana Radošinská,2021-09-08 We live in the era of the digital revolution characterized by easy access to obtaining processing and disseminating information on a global scale The emergence of these global digital spaces has transformed the world of communication This shift in our understanding of what we should be informed about when and how manifests itself not only within mature liberal democracies which grant their citizens and the media constitutionally guaranteed freedom of speech and rights associated with obtaining information but also within developing countries with different types of political establishments Moreover many media producers especially journalists and persons claiming to be journalists abuse their crucial mission and instead foster a set of serious communication phenomena that threaten basic human rights and freedoms weaken them or decelerate their development The publication is focused on the ways fake news disinformation misinformation and hateful statements are spread across

society predominantly within the online environment Its main ambition is to offer an interdisciplinary body of scholarly knowledge on fake news disinformation and propaganda in relation to today s journalism social development political situation and cultural affairs happening all around the world **World Communication** ,1996 **The Aims of Argument** Timothy W.
