Next Best Thing To Paradise:

Godchildren Nicholas Coleridge, 2011-12-29 An enthralling epic of love money power and revenge On a luxurious Balinese island the charismatic tycoon Marcus Brand entertains his six godchildren By the end of the weekend secrets will be revealed that will change everybody's life a climax to the web of lies and betrayals spun over the course of thirty years The godchildren are Charlie the aristocratic Old Etonian who's fascinated and enthralled by Marcus's wealth and who devotes his life to securing an inheritance Mary the daughter of one of Marcus's business colleagues her life is blighted by tragedy Jamie feckless but utterly charming he drifts from one job to another crossing Marcus's path just once too often for comfort Saffron delicate and sensitive as well as stunningly beautiful she is unaware of her power over men and of Marcus's power over her Abigail insecure and gauche she blames Marcus for the disaster of her life and Stuart the working class son of Marcus's dead chauffeur he is torn between admiration and hatred for his supremely successful capitalist godfather *Energy* John

Gibbons, 2013-04-17 We try in this book to provide a detailed but readable technical but accessible monograph on energy in the United States We treat energy as a multidisciplinary challenge and apply the standard tools of economists physicists engineers policy analysts and some might claim fortune tellers We hope that it will be used in classrooms of various types and read by the general reader as well That increased energy efficiency should be the first priority of energy policymakers is a conclusion not an assumption of our analysis Many analysts have arrived at this conclusion while working separately on energy supply problems The magnitude and scope of supply problems primarily problems of high prices and environmental costs lead one inexorably back to reducing demand growth as the first most important step in any plausible energy future We examine in some depth why much of the past literature on energy still points fallaciously in our opinion to high energy consumption futures This is in Part I called A Short History of the Future We devote one third of the book Part II to energy resources their internal and external costs and the quantities of energy to be derived from these resources This analysis provides a context within which the economic and social value of energy conservation options can be assessed

Aladdin from Broadway Frederic Stewart Isham, 1913 The plot of Aladdin from Broadway is predicated on the actual turn of the century native uprising in Damascus An Englishman and his infant daughter are kidnapped by insurgents and spirited away to a desert stronghold
