## **New Dialect Formation:**

**New-Dialect Formation** Peter Trudgill, 2006-01-05 This book presents a new and controversial theory about dialect contact and the formation of new colonial dialects It examines the genesis of Latin American Spanish Canadian French and North American English but concentrates on Australian and South African English with a particular emphasis on the development of the newest major variety of the language New Zealand English Peter Trudgill argues that the linguistic growth of these new varieties of English was essentially deterministic in the sense that their phonologies are the predictable outcome of the mixture of dialects taken from the British Isles to the Southern Hemisphere in the 19th century These varieties are similar to one another not because of historical connections between them but because they were formed out of similar mixtures according to the same principles A key argument is that social factors such as social status prestige and stigma played no role in the early years of colonial dialect development and that the work of colonial new dialect formation was carried out by children over a period of two generations The book also uses insights derived from the study of early forms of these colonial dialects to shed light back on the nature of 19th century English in the British Isles

**New-dialect Formation in Canada** Stefan Dollinger, 2008 This book details the development of eleven modal auxiliaries in late 18th and 19th century Canadian English in a framework of new dialect formation The study assesses features of the modal auxiliaries tracing influences to British and American input varieties parallel developments or Canadian innovations The findings are based on the Corpus of Early Ontario English pre Confederation Section the first electronic corpus of early Canadian English The data which are drawn from newspapers diaries and letters include original transcriptions from manuscript sources and texts from semi literate writers While the overall results are generally coherent with new dialect formation theory the Ontarian context suggests a number of adaptations to the current model In addition to its general Late Modern English focus New Dialect Formation in Canada traces changes in epistemic modal functions up to the present day offering answers to the loss of root uses in the central modals By comparing Canadian with British and American data important theoretical insights on the origins of the variety are gained The study offers a sociohistorical perspective on a still understudied variety of North American English by combining language internal features with settlement history in this first monograph length diachronic treatment of Canadian English in real time

**Dialect Change** Peter Auer, Frans Hinskens, Paul Kerswill, 2005-06-17 Dialects are constantly changing and due to increased mobility in more recent years European dialects have levelled making it difficult to distinguish a native of Reading from a native of London or a native of Bonn from a native of Cologne This comprehensive study brings together a team of leading scholars to explore all aspects of recent dialect change in particular dialect convergence and divergence Drawing on examples from a wide range of European countries as well as areas where European languages have been transplanted they examine a range of issues relating to dialect contact and isolation and show how sociolinguistic conditions differ hugely between and within European countries Each specially commissioned chapter is

based on original research giving an overview of work on that particular area and presenting case studies to illustrate the issues discussed. Dialect Change will be welcomed by all those interested in sociolinguistics, dialectology, the relevance of language variation to formal linguistic theories and European languages. **Language Change** Ernst Håkon Jahr, 1999

Changing English examines the history of English from its origins in the fifth century to the present day. It focuses on the radical changes that have taken place in the structure of English over a millennium and a half, detailing the influences of migration, colonialism, and many other historical, social, and cultural phenomena. Expert authors illustrate and analyze dialects, accents, and the shifting styles of individual speakers as they respond to changing circumstances. The reader is introduced to many key debates relating to the English language, illustrated by specific examples of data in context. Including key material retained from the earlier bestselling book *English: History, Diversity and Change*, this edition has been thoroughly reorganized and updated with entirely new material. Changing English explains basic concepts easily, located through a comprehensive index, includes contributions by experts in the field such as David Crystal, David Graddol, Dick Leith, Lynda Mugglestone, and Joan Swann, contains a range of source material and commissioned readings to supplement chapters. Changing English makes an essential contribution to the field of English language studies. *The Linguistics of the History of English* Remco Knooihuizen, 2023-10-27

This textbook approaches the history of English from a theoretical perspective. The book provides a brief chronological overview describing the way in which the English language has changed over time, from Old English to Modern English, while subsequent parts adopt a theoretical focus that is thematically organized to deal with the question of how and why English changed in the way it did, including a part addressing some specific contact-induced changes and key topics such as English as a Lingua Franca. Supported throughout with information boxes with empirical studies, the examples given are all drawn from English, but boxes with examples from other languages tie the development of the English language into changes in other contexts and settings. This book is an ideal resource for undergraduate students of the English Language and historical linguistics. **World Englishes in the 21st Century** Sofia Rüdiger, Theresa

Neumaier, Sven Leuckert and Sarah Buschfeld, Twenty years after Edgar W Schneider's publication of the Dynamic Model the field of World Englishes is as vibrant as ever. The further spread and entrenchment of English around the world as a result of globalisation but also localisation tendencies and in particular the spread of the language and its multiple varieties through the new media has led to even further dispersion and contact scenarios many of which challenge early conceptualisations of the World Englishes paradigm. This volume is dedicated to new perspectives, approaches and developments in the field: how they fit in with earlier research in the paradigm, how they can be conceptualised and which challenges they bring along. In addition, the collection showcases some of the methodological diversity in and the transdisciplinary nature of modern World Englishes research.

**The Role of Semantic, Pragmatic, and Discourse Factors in the Development of Case** Jóhanna Barðdal, Shobhana L. Chelliah, 2009-03-11

The aim of this volume is to bring non syntactic factors in the development of case into the eye of the research field by illustrating the integral role of pragmatics, semantics and discourse structure in the historical development of morphologically marked case systems. The articles represent fifteen typologically diverse languages from four different language families: i Indo-European Vedic Sanskrit, Russian, Greek, Latin, Latvian, Gothic, French, German, Icelandic and Faroese; ii Tibeto-Burman, especially the Bodic languages and Meithei; iii Japanese; and iv the Pama-Nyungan mixed language Gurindji Kriol. The data also show considerable diversity and include elicited, archival, corpus-based and naturally occurring data. Discussions of mechanisms where change is obtained include semantically and aspectually motivated synchronic case variation, discourse motivated subject marking, reduction or expansion of case marker distribution, case syncretism motivated by semantics, syntax or language contact, and case splits motivated by pragmatics, metonymy and subjectification.

*Dialect and Migration in a Changing Europe* Klaus Mattheier, 2000

In the course of a general process of social modernization throughout Europe since the early modern period, a communicative modernization has also taken place. In this context, both horizontal mobility and the various forms of population shift connected with it have played a role. European sociolinguistic research has dealt with the various social reasons for these variety shifts and variety changes. These articles are compiled and edited for the first time in the submitted work.

**Principles at work.** Tobias Weber, 2013-11-04

Master's Thesis from the year 2013 in the subject English Language and Literature Studies / Linguistics, grade 1.0, Dresden Technical University, Anglistik language English abstract. This paper deals with different explanatory models for the emergence or existence of linguistic features in varieties of the English language. After a brief overview of the current research, five non-standard varieties from all over the world, ranging from a traditional dialect to pidgins and creoles, are analyzed in two morphosyntactic and two phonological features. The theoretical approaches are discussed with reference to the features, providing recommendations for or advice against certain explanatory models. Finally, Bybee's usage-based functionalist approach and the usage-based synthesis of new dialect formation according to Ansaldo are highlighted as

plausible explanations for the features Formalist descriptive universals are rejected in favour of functionalist cognitive universals in human language processing acquisition and evolution as they occur in language contact or speaker contact scenarios the driving force of language change     *New Dialect Formation* Yun-Hsuan Kuo,2005     *Dialect Matters* Peter Trudgill,2016-08-04 Trudgill s lively book traces the histories of dialects and accents and defends the legitimacy of the language of ordinary people     **Publication of the American Dialect Society** ,1944     **English Linguistics** ,2006

Language and Dialect Contact in Ireland Warren Maguire,2020 Traces the phonological origins of one of the oldest colonial varieties of English Draws on data from the phonology and phonological history of Ulster English and regional varieties of English and Scots Examines consonantal features including velar palatalisation pre R dentalisation epenthesis consonant cluster simplification palatal velarisation and non rhoticity Examines the origins of vowel quality and quantity including the Scottish Vowel Length Rule and vowel lexical distribution Draws on theories of language contact and shift reinforcement koine isation new dialect formation and colonial lag Draws on previously unpublished phonological data for Mid Ulster English from the Linguistic Survey of Scotland and from a corpus of audio recordings of traditional south west Tyrone English Warren Maguire examines Mid Ulster English as a key case of new dialect formation considering the roles of language shift and dialect contact in its phonological development He explores the different processes which led to the development of MUE through contact between dialects of English Scots and Irish and examines the history of a wide range of consonantal and vocalic features In addition to determining the phonological origins of MUE Maguire shows us why the dialect developed in the way that it did and considers what the phonology of the dialect can tell us about the nature of contact between the input language varieties In doing so he demonstrates the kinds of analysis and techniques that can be used to explain the development of extra territorial varieties of English and colonial dialects in complex situations of contact and shows that Irish English provides a useful testing ground for models of new dialect formation     **Isolation and**
