New Worlds From Old:

New Worlds, Old Ways Karen Lord, 2016-11-15 Discover some of the best in speculative short fiction from the Caribbean's up and coming voices The Caribbean has a powerful modern tradition of fantastic literature that's on full display in this anthology of original fiction by writers from Barbados Trinidad and Tobago and Bermuda None of these writers is likely to be familiar to American audiences but all are worth getting to know Readers who love the writing of Nalo Hopkinson Tobias S Buckell and Lord herself will savor this volume Publishers Weekly Starred Review Do not be misled by the speculative in the title Although there may be robots and fantastical creatures these common symbols are tools to frame the familiar from fresh perspectives Here you will find the recent past and ongoing present of government and society with curfews crime and corruption the universal themes of family growth and death love and hate the struggle to thrive when power is capricious and revenge too bittersweet Here too is the passage of everything old ways places peoples and ourselves leaving nothing behind but memories histories and stories This anthology speaks to the fragility of our Caribbean home but reminds the reader that although home may be vulnerable it is also beautifully resilient The voice of our literature declares that in spite of disasters this people and this place shall not be wholly destroyed Read for delight then read for depth and you will not be disappointed Brand new stories by Tammi Browne Bannister Summer Edward Portia Subran Brandon O'Brien Kevin Jared Hosein Richard B Lynch Elizabeth J Jones Damion Wilson Brian Franklin Ararimeh Aiyejina and H K Williams Pictorial Geography of the World: Old world Samuel Griswold Goodrich, 1856 **Empires of the Maya** Jill Rubalcaba, 2009 Long before European boats reached the shores of the Americas sophisticated civilizations had already developed throughout the continents The empire of the Maya located in modern Mexico and Central America influenced civilization there for centuries The ancient Maya had fully developed the idea of the calendar detailed a writing system pioneered new ideas in agriculture and built towering palaces and temples that still stand today Empire of the Ancient Maya gives a brief summary of the history of the empire placing it within the context of its time period and geographical location and then explores the evolution of Maya civilization from its origin through the classic period to the Spanish conquest Delving into daily life the book includes Maya achievements in mathematics astronomy technology political organization commerce architecture and the arts *The Old world* Joseph Pomeroy Widney, 1907 *Trading Territories* Jerry Brotton, 1998 In this generously illustrated book Jerry Brotton documents the dramatic changes in the nature of geographical representation which took place during the sixteenth century explaining how much they convey about the transformation of European culture at the end of the early modern era He examines the age's fascination with maps charts and globes as both texts and artifacts that provided their owners with a promise of gain be it intellectual political or financial From the Middle Ages through most of the sixteenth century Brotton argues mapmakers deliberately exploited the partial often conflicting accounts of geographically distant territories to create imaginary worlds As long as the lands remained inaccessible these maps and globes were politically compelling They

bolstered the authority of the imperial patrons who employed the geographers and integrated their creations into ever more grandiose rhetorics of expansion As the century progressed however geographers increasingly owed allegiance to the administrators of vast joint stock companies that sought to exploit faraway lands and required the systematic mapping of commercially strategic territories By the beginning of the seventeenth century maps had begun to serve instead as scientific guides defining objectively valid images of the world
