*Opening to the Infinite* Stephan A. Schwartz, 2007 Awakening is the log kept by Arthur Davies senior analyst for the U S Senate Committee on Commerce Science and Transportation who became convinced an alien really was being held by the government at a secret facility The log is his story of what he did with that information and how that experience showed him

The Epistles of St. Peter John Henry Jowett, 1905    Difficult Atheism Christopher Watkin, 2011-05-16 Reassesses the term atheism in the context of contemporary French philosophy Drawing primarily on the work of Alain Badiou Jean Luc Nancy and Quentin Meillassoux Watkin explores post theological reassessments of atheism through the ideas of the death of God and nihilism in contemporary French philosophy and probes the limits of any atheistic politics He argues that rigorous atheism is elusive and that Continental thought even in its most stridently atheistic guises has yet fully come to terms with the death of God

A Semiotic Theory of Theology and Philosophy Robert S. Corrington, 2000-11-09 The concern of this work is with developing an alternative to standard categories in theology and philosophy especially in terms of how they deal with nature Avoiding the polemics of much contemporary reflection on nature it shows how we are connected to nature through the unconscious and its unique way of reading and processing signs Spinoza s key distinction between natura naturans and natura naturata serves as the governing framework for the treatise Suggestions are made for a post Christian way of understanding religion Robert S Corrington s work represents the first sustained attempt to bring together the fields of semiotics depth psychology pragmaticism and a post Monotheistic theology of nature Its focus is on how signification functions in human and non human orders of infinite nature Our connection with the infinite is described in detail especially as it relates to the use of sign systems

**Nature's Primal Self** Nam T. Nguyen, 2011-12-28 Nature s Primal Self examines Corrington s thought called ecstatic naturalism in juxtaposition to both C S Peirce s pragmatic and semiotic concept of the self and Karl Jaspers existential elucidation of Existenz Peirce s and Jaspers anthropocentrism is thus corrected by Corrington s ecstatic naturalism Ecstatic naturalism as a new movement is both a semiotic theoretical method and a metaphysics that probes deeply into the ontological divide between nature naturing and nature natured Author Nam T Nguyen attempts to achieve three goals first to present and elucidate the underlying philosophical concepts of Charles Peirce Karl Jaspers and Robert Corrington second to critique the anthropocentric self of Peirce s semiotic pragmatism and of Jaspers existential anthropology periechontology from the standpoint of ecstatic naturalism and third to introduce the concept of nature s primal self radically grounded in the perspective of ecstatic naturalism as a judicious more encompassing and richer framework compared to Peirce s semiotic construction of the self and Jaspers existential concept of Existenz

**Nature and Nothingness** Robert S. Corrington, 2017-01-23 Is nothingness found in nature or is it in some realm disconnected from nature Nature and Nothingness An Essay in Ordinal Phenomenology argues for the former and explores four types of nothingness as found in nature holes in nature totalizing nothingness in horror naturing nothingness and

encompassing nothingness Using ordinal phenomenology Robert S Corrington reveals the great perennial fissuring within the one nature that there is The book includes a detailed analysis of religious violence as it correlates to the woes in nature such as anxiety bereavement loss fear of fragmentation and loss of identity It also examines the various ways in which horror is encountered in a literary context using the work of Edgar Allan Poe and H P Lovecraft The analysis is comparative and makes use of feminist philosophy as well as Buddhist Taoist theosophical and American philosophy Using resources from ecstatic naturalism and deep pantheism Corrington argues that though nothingness takes many forms they are all guises of the same vast Nothingness    **The Open Court** ,1922    *Engineering Experiment Station Bulletin* ,1955    **Real Analysis and Differential Equations**
