**Operations Management in Context** Les Galloway, Frank Rowbotham, Masoud Azhashemi, 2012-10-02 Operations Management in Context is a straightforward and accessible text which provides students with a good grounding in the theory and practice of operations management and its role within organisations. The structure is clear and logical, leading the newcomer to the subject through the topics in a way to maximise comprehension, highlighting key issues and using case studies and examples from business to contextualise learning. Chapters are structured to enable incremental and progressive learning with a logical development of the content. Each chapter is linked and ends with a summary of the key points met in the text to aid revision. Exercises and self assessment questions are included to reinforce learning and maintain variety, with answers included at the end of the book. The text is accompanied by a lecturer's supplement.

**Guide to Operations Management** David Bamford, Paul Forrester, 2010-08-30. This book is a novel treatment of Operations Management. It takes a fresh insight to this increasingly important topic, exploring fundamental principles equally applicable to service and manufacturing situations. The book adapts a strategic stance by providing a framework for effective decision making and is aimed at practising managers who need to design working processes, manage change and make decisions within a strategic framework. The framework and supporting case vignettes allow the practitioner to grasp essential concepts quickly in a range of different operational contexts. Bamford and Forrester have done an excellent job in creating a concise, salient and appealing approach; they have captured the essential elements of designing processes, products and work organizations, exploring approaches to operations planning and control, managing change through effective project management and technology transfer, and then managing quality and improvement strategies. Professor Rob Handfield, Professor of Supply Chain Management, North Carolina State University USA. This is an excellent, concise text that introduces students to all of the key areas; it's an invaluable aid for students in understanding all of the major aspects of operations and their importance to the success of businesses. Professor Steve Brown, Professor of Management, University of Exeter Business School, University of Exeter UK. For today's or tomorrow's business leaders, this text has well-structured, invaluable content ready for immediate adoption. Follow the guide, put it into practice and the rewards will follow. Mr Vernon Barker, Managing Director, First TransPennine Express First Group Plc UK. This book combines technical theory with real life experience, street smarts in a flowing read.
