Johnson, 1997-07-07 Phillip E Johnson provides an easy to understand guide on how to effectively engage the debate over creation and evolution **Opening Hearts by Opening Minds** Connie Wineland, 2007-06-01 This book is for Christian readers of fiction who might experience difficulty trying to make an informed choice beyond what is being published by evangelical presses Marketed to a specific target audience evangelical fiction oftentimes leaves a reader with a strong emotional response but lacks the literary depth or the breadth of subject that could inspire life changing spiritual growth With this premise at the heart of her book Connie Wineland includes her own story of conversion to Christianity by way of reading fiction During her late twenties and early thirties particularly while in graduate school Wineland became immersed in literary and rhetorical studies while also practicing an Eastern form of religion as well as Native American spirituality However despite all her training in literary theory her readings in Romantic Victorian modern and postmodern literature which she explains as well as her personal interest in mythology and world religions kept her questioning the existence of God and the possible nature of God Then as a relatively new convert to Christianity she faced several challenges at a small Christian college where she taught literature and writing courses

Eventually wanting to reach beyond the academic community Wineland began a local Christian readers group which she ran for four years She includes in this book resources and materials such as sample syllabi and study guide questions useful Web addresses and plenty of how to information for starting and running your own book club Also included is an extensive list of annotated titles of recommended reading to get anyone started *Opening Minds* Peter H. Prinz,2012-03-16 A novel proposal that the cognitive architecture for volition and cognition arises from particular kinds of social interaction and communication In *Open Minds* Wolfgang Prinz offers the novel claim that agency and intentionality are first perceived and understood in others and that it is only through practices and discourses of social mirroring that individuals come to apply these features to themselves and to shape their architectures for volition and cognition accordingly Developing a social science constructive approach within a cognitive science representational framework Prinz argues that the architectures for agency volition and intentionality cognition arise from particular kinds of social interaction and communication Rather than working as closed individual systems our minds operate in ways that are fundamentally open to other minds Prinz describes mirror systems and mirror games particular kinds of representational mechanisms and social games that provide tools for aligning closed individual minds with other minds He maps the formation of an architecture for volition addressing issues of agency and intention based top down control then outlines the ways the same basic ideas can be applied to an architecture for cognition helping to solve basic issues of subjectivity and intentionality Addressing the reality and efficacy of such social artifacts as autonomy and free will Prinz contends that our beliefs about minds are not just beliefs about their workings but powerful tools for making them work as we believe It is through our beliefs that our minds work in a particular way that we actually make them work in that way **Opening Minds, Opening Doors** Daniel M.
