Operation Artemis:

Operation Artemis Douglas Scott, 1979 **European Union Military Operations** Niklas I. M. Nováky, 2018-01-12

This book offers an in depth study on the deployment of military operations in the framework of the European Union's Common Security and Defence Policy (ESDP/CSDP). While existing studies of the subject are either descriptive or focused on a single level of analysis, this book incorporates factors from three different levels of analysis to explain the deployment of ESDP military operations. First, the international level where the emergence of events that threaten certain values held dear by EU member states catalyses the process leading to an operation; second, the national level where the member states formulate their initial national preferences towards a prospective deployment based on national utility expectations; and third, the EU level where the member states come to negotiate and seek compromises to accommodate their different national preferences towards a deployment. The strength of this multi-level collective action approach is demonstrated by four in-depth military case studies which analyse the preference formation of France, Germany and the UK towards the deployments of Operation Althea in Bosnia and Herzegovina, Operation Artemis and EUFOR RD Congo in the Democratic Republic of the Congo (DRC) and Operation Atalanta off the coast of Somalia respectively. The author draws on a wealth of primary sources including over 50 semi-structured interviews conducted with national and EU officials during 2011-15 and provides an up-to-date overview and critique of the existing theoretical literature on the deployment of ESDP/CSDP military operations. This book will be of much interest to students of European security, EU politics, military and strategic studies and International Relations in general.

Operation EUFOR TCHAD/RCA and the European Union's Common Security and Defense Policy Bjoern H. Seibert, 2010. Addressing security challenges posed by weak and failed states will require increasingly demanding military interventions often over a great distance and prolonged periods of time. As a result of several engagements over the last decade, the U.S. military has gained valuable experience in undertaking stability operations. However, the United States should not be expected to fulfill such operations alone; we must look to our partners and allies to share some of the global responsibility. In this, Europe is unquestionably the most capable and natural U.S. ally. While most U.S. policymakers are familiar with the North Atlantic Treaty Organization, developments in the field of security and defense within the European Union (EU) have thus far received little attention in the United States despite the EU's increasing importance. One such operation in Africa, Operation EUFOR TCHAD/RCA, provides a look inside the workings of an EU military operation, highlights successes and failures, and draws lessons learned.

Fault Lines of International Legitimacy Hilary Charlesworth, Jean-Marc Coicaud, 2010-02-25. *Fault Lines of International Legitimacy* deals with the following questions: What are the features and functions of legitimacy in the international realm? How does international legitimacy, as exemplified in particular by multilateral norms, organizations and policies, change over time? What role does the international distribution of power and its evolution have in the establishment and transformation of legitimacy paradigms? To what extent

do democratic values account for the growing importance of legitimacy and the increasing difficulty of achieving it at the international and the national level One of the central messages of the book is that although the search for international legitimacy is an elusive endeavor there is no alternative to it if we want to respond to the intertwined demands of justice and security and make them an integral and strategic part of international relations
