*Business and Professional Communication* Steven A. Beebe, Timothy P. Mottet, Seth S. Frei, 2026-02-03 *Business and Professional Communication Principles and Skills for Leadership* focuses on the essential concepts and skills of business and professional communication emphasizing leadership in today's global workplace. *Media Literacy in Action* Renee Hobbs, 2021-01-07 The blurring of entertainment information and persuasion is reshaping work life and citizenship. As a result, our relationship to media has never been so important nor so complex. By asking critical questions about what they watch, listen to, read, and use, students can be better prepared to be responsible communicators who can use a variety of formats and genres for self-expression and advocacy. Covering a wide range of topics including the rise of news partisanship, algorithmic personalization, and social media stereotypes and media addiction, advertising and media economics, and media influence on personal and social identity, Renee Hobbs helps students develop the lifelong learning competencies and habits of mind needed to navigate an increasingly complex media environment. Rooted in the best practices of media literacy pedagogy, *Media Literacy in Action* brings an interdisciplinary approach to media studies that engages students with the following features: full color layout, engaging questions to stimulate thoughtful dialogue and reflection, contemporary media examples designed to cultivate intellectual curiosity, suggested activities for advancing students' confidence in oral, written, and multimedia expression, access to videos and multimedia resources at [www.medialiteracyaction.com](http://www.medialiteracyaction.com).

*Promoting K-12 Civic Learning and Engagement Through Assessment* Laura S. Hamilton, Samuel H. Rikoon, David Kidd, 2026-01-22 *Promoting K-12 Civic Learning and Engagement Through Assessment* is a comprehensive guide to the assessment of civic learning in primary and secondary education contexts. Today's schools have a responsibility to teach learners how to critically evaluate information, understand the rights and responsibilities of citizenship, and engage with people whose perspectives and experiences differ from their own. This book provides a vision for testing, measurement, and assessment efforts that support this broad vision of high quality civic learning for all students. The first section sets the stage for the rest of the volume by exploring historical, conceptual, and technological foundations of civic learning and assessment. The second section explores approaches to monitoring school-based civic learning opportunities and outcomes at the system level. It examines necessary innovations in large-scale assessment in order to generate high quality data on a range of civic opportunities and outcomes. The third and final section presents work on assessment tools and strategies that directly support educators, students, and communities in cultivating meaningful civic engagement. Scholars, teaching faculty, and graduate students of educational measurement, leadership, and policy, in addition to professionals in the assessment development field and other nonprofits who are invested in fostering civic competencies among learners, will find an

Modern Media Literacy: Generative AI, Social Media, and the News Hallaq, Tom, Groshek, Jacob, 2025-09-04 In an era defined by digital transformation, modern media literacy evolves to address generative AI, social media, and the news. As AI-driven tools shape the creation and dissemination of information, traditional boundaries blur, challenging individuals to critically assess sources, motives, and authenticity. Social media platforms increase these dynamics, accelerating the spread of both credible journalism and misleading content generated by algorithms. In this context, media literacy navigates a system where human and machine-produced content coexist. Understanding how generative AI influences media narratives may foster more informed, responsible, and resilient digital citizens. *Modern Media Literacy: Generative AI, Social Media, and the News* explores the evolving landscape of media consumption and critical analysis in the digital age. It examines how digital media literacy can be assessed in higher education, emphasizing the need for valid and reliable tools to measure the critical skills students need to navigate today's complex media environment. This book covers topics such as critical thinking, digital technology, and social media and is a useful resource for media and communications professionals, sociologists, computer engineers, educators, academicians, researchers, and scientists.
