### Window Light Portraits

Opposite page: Dark, natural light on the side of the lighthouse in the morning, with all windows open to let in lots of light on the opposite side.

10. Light is not always your enemy when the window blinds are open. When you're in the process of taking a portrait, the window is on the right, just open your curtains to reveal bright light from the opposite window on the left, creating a soft, even, even light without any harsh shadows.

11. For most window-light photos, "natural light" was taken at the side of your face with a camera that's oriented to the sun with the lens diagonal, so the sun follows you as you move. But for me, by taking the opposite side, the sun follows me as I move, and I can take a photo with the lens parallel to the sun, so it's easier to focus and a much faster and a quicker way of shooting with the sun at your back.

12. This scene might sound a little hokey, but your subjects love it when you're smiling and talking to others while shooting a photo of them, again for those window-light photographs. As you're talking to one that makes your subjects feel at ease, don't have your camera held too far away, instead hold it close to the side of the other person's face, as that feels like you're talking to them.

*International Marketing, Google eBook* Masaaki (Mike) Kotabe, Sween Hoon Ang, Kathleen Griffiths, Al Marshall, Ranjit Voola, Kristiaan Helsen, 2012-02-02

International Marketing Third Asia Pacific edition has been updated to reflect contemporary developments and examples in international marketing. The text retains the strengths of the original Global Marketing Management text by Masaaki Kotabe and Kristiaan Helsen and is presented in an engaging and accessible style. International Marketing Third Asia Pacific edition aims to help Australasian students understand contemporary international marketing activities and issues in an increasingly competitive marketplace  
*Tech Giants, Artificial Intelligence, and the Future of Journalism* Jason Paul

Whittaker, 2019-02-11 This book examines the impact of the Big Five technology companies Apple, Alphabet, Google, Amazon, Facebook and Microsoft on journalism and the media industries. It looks at the current role of algorithms and artificial intelligence in curating how we consume media and their increasing influence on the production of the news. Exploring the changes that the technology industry and automation have made in the past decade to the production, distribution and consumption of news globally, the book considers what happens to journalism once it is produced and enters the media ecosystems of the internet tech giants and the impact of social media and AI on such things as fake news in the post-truth age. The audience for this book are students and researchers working in the field of digital media and journalism studies or media studies more generally. It will also be useful to those who are looking for extended case studies of the role taken by tech giants such as Facebook and Google in the fake news scandal or the role of Jeff Bezos in transforming The Washington Post. The Open Access version of this book available at <https://doi.org/10.4324/9781351013758> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
