

How effective is art therapy for trauma recovery?

01

Art therapy offers multiple techniques for trauma recovery. Mandala creation, body mapping, expressive collage, digital art, and guided visualization are some effective methods.

02

Creating mandalas can increase calmness and focus in just 15-20 minutes. Body mapping helps trauma survivors reconnect with their physical selves and track progress over time.

03

Expressive collage allows for metaphorical expression of complex emotions. Digital art reduces anxiety about making mistakes and appeals to younger clients or those with physical limitations.

With AI cryptocurrency and more in the news it seems that being an entrepreneur means being in IT but humanities graduates are launching new businesses every day turning a profit and having social impact This book explores how a humanities background can enable entrepreneurs to thrive Across all levels of education students are given the message that to change the world or make money the arts and humanities are not the subjects to study At the same time discussions of innovation and entrepreneurship highlight the importance of essential skills such as critical thinking storytelling cultural awareness and ethical decision making Here s the disconnect the subjects that help to develop these vital skills are derided at critical points in any aspiring entrepreneur s education This collection of perspectives from entrepreneurs in a range of fields and humanities educators illustrates what individuals and the wider world are missing when humanities are overlooked as a source of inspiration and success in business Featuring a foreword by Sensemaking author Christian Madsbjerg this is a thought provoking guide for aspiring entrepreneurs in all sectors and for educators a window on the practical value of the humanities in an ever more mechanized world _ **Sail Through the Storms with Cash Transfer** Jonatan

Lassa, 2022-11-22 World Humanitarian Summit in 2016 call for humanitarian industries including the United Nations and NGOs to bolder promote the use of cash transfers in responding to disasters This book documents experiences and collects personal accounts on disasters COVID 19 and cash transfers from disaster survivors in Indonesia whose lives intersect with other survivors and humanitarian responders ranging from local activists to NGOs workers The survivors are often labelled as project beneficiaries Cash assistance and disaster payments are temporary income for the affected community It is no silver bullets despite their rich potential to reduce vulnerability and suffering One of the promises of such assistance is that it can help both women and children survive and rebuild their lives after a crisis be it from a natural catastrophe or man made

hazards The question is how such assistance is understood in a fuller context of a survivor's complex life To its critics humanitarian cash assistance is like a drop of salt in the ocean in that it is not enough to make a difference to disaster affected people's lives Nevertheless the question is how a relatively small size and temporarily distributed cash assistance within a short time window can significantly impact the beneficiaries' life at a particular time and places ruined by disasters Survivors and beneficiaries are not just numbers They are humans with stories worth listening to This book shows that to what extent cash assistance can be of meaningful they must be understood in a fuller context of people's lives stories including their wade dreams that go beyond the cold and dry quantitative evaluation measures that are often chasing the numbers with a certain percentage of Yes and No in agreeing or disagreeing about how good and helpful support is to the life of the crisis affected people
