historians have primarily focused on iconographic and stylistic issues and generally treated these programs as individual commissions of regional courts this book places the works of art within their broad cultural and historical contexts during the Enlightenment This monograph explains how rulers gradually shifted from emphasizing military heroism to stressing their cultivation of the arts and sciences and addresses how expressing membership in a specifically European civilization emerged as an integral visual theme and a key ambition of the German nobility **German Universities** James Morgan Hart,1902 **Bibliographic Guide to Art and Architecture** New York Public Library.
