

# Treatment Strategies in Hypertension

**1.13 billion**  
people worldwide  
have hypertension

**1 in 4 men**  
and **1 in 5 women**  
had hypertension in 2015

**<1 in 5 people**  
with hypertension have the  
problem under control

**The Present:**  
significant gaps in  
diagnosis and treatment

In the last few years there has been an impressive paucity  
of innovative studies

Research focused on BP mechanisms and novel  
antihypertensive drugs is dramatically slowing

**The Future:**

Digital/health technology is expected to be increasingly used

Several areas should be better outlined with regard to BP  
diagnosis and treatment targets

The existing antihypertensive drugs should be better used by  
exploiting available and novel free and fixed combinations

Renal artery denervation is another procedure which proved  
effective in the management of hypertension
