Reference Laure Gardelle, Vincent-Durroux, Hélène Vinckel-Roisin, 2023-02-02 This volume provides an innovative approach to the referential process thanks to its focus on the relationship between conventions and discourse pragmatics It brings together a cross section of current research on referential conventions and pragmatic strategies in a number of different fields formal and theoretical linguistics semantics discourse analysis psycholinguistics interactional linguistics natural language processing in a variety of verbal and non verbal languages English German different varieties of French Indonesian French Belgian Sign Language and in a diversity of contexts the coining of names language acquisition second language learning and various genres such as news articles narratives satire or game playing The volume is meant as a series of thought provoking studies which place speakers and addressees at the core of the referential act thus providing evidence on how they negotiate and adjust depending on the context

Religion, Education and the State Mark Strasser, 2016-04-08 In the context of education Church and State issues are of growing importance and appear to be increasingly divisive This volume critically examines the developing jurisprudence relating to religion in the schools beginning with *Everson v Board of Education* where the US Supreme Court discussed the wall of separation between Church and State The study traces both how the Court's views have evolved during this period and how through recharacterizations of past opinions and the facts underlying them the Court has appeared to interpret Establishment Clause guarantees in light of the past jurisprudence when in reality that jurisprudence has been turned on its head The Court not only offers an unstable jurisprudence that is more likely to promote than avoid the problems that the Establishment Clause was designed to prevent but approaches Establishment Clause issues in a way that decreases the likelihood that an acceptable compromise on these important issues can be reached The study focuses on the situation in the US but the important issue of religion education and the state has great relevance in many jurisdictions
