## Minimal Surfaces Stratified Multivarifolds And The Plateau Problem Translations Of Mathematical Monographs

### Vol 84:

*Arithmetic of Probability Distributions, and Characterization Problems on Abelian Groups* Gennadii Mikhaïlovich Fel'dman, 1993 This book studies the problem of the decomposition of a given random variable into a sum of independent random variables components Starting from the famous Cramer theorem which says that all components of a normal random variable are also normal random variables the central feature of the book is Feldman's use of powerful analytical techniques In the algebraic case one cannot directly use analytic methods because of the absence of a natural analytic structure on the dual group which is the domain of characteristic functions Nevertheless the methods developed in this book allow one to apply analytic techniques in the algebraic setting The first part of the book presents results on the arithmetic of probability distributions of random variables with values in a locally compact abelian group The second part studies problems of characterization of a Gaussian distribution of a locally compact abelian group by the independence or identical distribution of its linear statistics Tube Domains and the Cauchy Problem Semen Grigor'evich Gindikin, This book is dedicated to two problems The first concerns the description of maximal exponential growth of functions or distributions for which the Cauchy problem is well posed The descriptions presented in the language of the behaviour of the symbol in a complex domain The second problem concerns the structure of and explicit formulas for differential operators with large automorphism groups It is suitable as an advanced graduate text in courses in partial differential equations and the theory of distributions

*Arithmetic of Probability Distributions, and Characterization Problems on Abelian Groups* Gennadij M. Fel'dman, This book studies the problem of the decomposition of a given random variable introduction a sum of independent random variables components The central feature of the book is Feldman's use of powerful analytical techniques Selected Problems in Real Analysis M. G. Goluzina, A. A. Lodkin, A. N. Podkorytov, This book is intended for students wishing to deepen their knowledge of mathematical analysis and for those teaching courses in this area It differs from other problem books in the greater difficulty of the problems some of which are well known theorems in analysis Nonetheless no special preparation is required to solve the majority of the problems Brief but detailed solutions to most of the problems are given in the second part of the book This book is unique in that the authors have aimed to systematize a range of problems that are found in sources that are almost inaccessible especially to students and in mathematical folklore Conformal Mappings and Boundary Value Problems Guo-Chun Wen, Translated from the Chinese Conformal mapping and boundary value problems are two major branches of complex function theory The former is the geometric theory of analytic functions and the latter is the analysis theory governing the close relationship between abstract theory and many concrete problems Topics include applications of Cauchy type integrals the Hilbert boundary value problem quasiconformal mappings and basic boundary value problems for harmonic functions Annotation copyright by Book News Inc Portland OR Tensor Spaces and Exterior

Algebra Takeo Yokonuma, 1992 This book explains as clearly as possible tensors and such related topics as tensor products of vector spaces tensor algebras and exterior algebras You will appreciate Yokonuma's lucid and methodical treatment of the subject This book is useful in undergraduate and graduate courses in multilinear algebra Tensor Spaces and Exterior Algebra begins with basic notions associated with tensors to facilitate understanding of the definitions Yokonuma often presents two or more different ways of describing one object Next the properties and applications of tensors are developed including the classical definition of tensors and the description of relative tensors Also discussed are the algebraic foundations of tensor calculus and applications of exterior algebra to determinants and to geometry This book closes with an examination of algebraic systems with bilinear multiplication in particular Yokonuma discusses the theory of replicas of Chevalley and several properties of Lie algebras deduced from them

**Uncountably Categorical Theories** Boris Zilber, The 1970s saw

the appearance and development in categoricity theory of a tendency to focus on the study and description of uncountably categorical theories in various special classes defined by natural algebraic or syntactic conditions There have thus been studies of uncountably categorical theories of groups and rings theories of a one place function universal theories of semigroups quasivarieties categorical in infinite powers and Horn theories In Uncountably Categorical Theories this research area is referred to as the special classification theory of categoricity Zilber's goal is to develop a structural theory of categoricity using methods and results of the special classification theory and to construct on this basis a foundation for a general classification theory of categoricity that is a theory aimed at describing large classes of uncountably categorical structures not restricted by any syntactic or algebraic conditions

*Russian Mathematical Surveys*, 1992

Subgroups of Teichmuller Modular Groups Nikolai V. Ivanov, 1992-12-28 Teichmuller modular groups also known as mapping class groups

of surfaces serve as a meeting ground for several branches of mathematics including low dimensional topology the theory of Teichmuller spaces group theory and more recently mathematical physics The present work focuses mainly on the group theoretic properties of these groups and their subgroups The technical tools come from Thurston's theory of surfaces his classification of surface diffeomorphisms and the theory of measured foliations on surfaces The guiding principle of this investigation is a deep analogy between modular groups and linear groups For some of the central results of the theory of linear groups such as the theorems of Platonov Tits and Margulis Soifer the author provides analogous results for the case of subgroups of modular groups The results also include a clear geometric picture of subgroups of modular groups and their action on Thurston's boundary of Teichmuller spaces Aimed at research mathematicians and graduate students this book is suitable as supplementary material in advanced graduate courses

Introduction to the General Theory of Singular Perturbations S. A. Lomov, This book is aimed at researchers and students in physics mathematics and engineering It

contains the first systematic presentation of a general approach to the integration of singularly perturbed differential equations describing nonuniform transitions such as the occurrence of a boundary layer discontinuities boundary effects and

so on The method of regularization of singular perturbations presented here can be applied to the asymptotic integration of systems of ordinary and partial differential equations    **Typical Singularities of Differential 1-forms and Pfaffian Equations** Mikhail Zhitomirskii, 1992 Singularities and the classification of 1 forms and Pfaffian equations are interesting not only as classical problems but also because of their applications in contact geometry partial differential equations control theory nonholonomic dynamics and variational problems In addition to collecting results on the geometry of singularities and classification of differential forms and Pfaffian equations this monograph discusses applications and closely related classification problems Zhitomirskii presents proofs with all results and ends each chapter with a summary of the main results a tabulation of the singularities and a list of the normal forms The main results of the book are also collected together in the introduction    *Vietnam Journal of Mathematics* ,2001    **Notices of the American Mathematical Society** American Mathematical Society,1991    **Mathematical Reviews** ,1991    **American Book Publishing Record** ,1992  
**Books in Print** ,1991    *The Plateau Problem* A.T. Fomenko,1990-01-31
