Minor Latin Poets Vol 1:

Minor Latin Poets, Vol 1 (2nd Rev Ed) [Loeb Classical Library 284]. Minor Latin Poets, 1982 **Andrew Marvell** A. D. Cousins, 2016-03-02 This monograph studies how across the Folio of 1681 Marvell's poems engage not merely with different kinds of loss and aspiration but with experiences of both that were in mid-seventeenth century England disturbingly new and unfamiliar. It particularly examines Marvell's preoccupation with the search for home and with redefining the homeland in times of civil upheaval. In doing so it traces his progression from being a poet who plays sophisticatedly with received myth to being one who is a national mythmaker in rivalry with his poetic contemporaries such as Waller and Davenant. Although focusing primarily on poems in the Folio of 1681 this book considers those poems in relation to others from the Marvell canon including the Latin poems and the satires from the reign of Charles II. It closely considers them as well in relation to verse by poets from the classical past and the European especially English present. *A Translation and Interpretation of Horace's Iambi* Andy Law, 2024-03-25 Horace's book of seventeen iambs by convention called Epodes contains some of the most complex and controversial poetry of his entire career. This new interpretation exposes a poet in the throes of the torment of writing. Horace crafts an artwork which reveals the agony of expressing agony. He struggles to find the words as he gives voice to the anticipation of grief. The poet's inner demons conspire against him. Anything that could go wrong does go wrong. At the end we realise that Horace might have never wanted to write this book in the first place. But the fate of this writer is to be forever persecuted by his own writing. Horace's iambs are methodically stitched together. Meter, intertextuality, wordplay and theme combine strategically to provide an utterly compelling and vivid watercolor in words. It is a work of art which is able to hold its place amongst any top tier poetry in any language in any era. *Representing Beasts in Early Medieval England and Scandinavia* Michael D. J. Bintley, Thomas J. T. Williams, 2015 Essays on the depiction of animals, birds and insects in early medieval material culture from texts to carvings to the landscape itself. For people in the early Middle Ages the earth, air, water and ether teemed with other beings. Some of these were sentient creatures that swam, flew, slithered or stalked through the same environments inhabited by their human contemporaries. Others were objects that a modern beholder would be unlikely to think of as living things but could yet be considered to possess a vitality that rendered them potent. Still others were things half glimpsed on a dark night or seen only in the mind's eye: strange beasts that haunted dreams and visions or inhabited exotic lands beyond the compass of everyday knowledge. This book discusses the various ways in which the early English and Scandinavians thought about and represented these other inhabitants of their world and considers the multi-faceted nature of the relationship between people and beasts. Drawing on the evidence of material culture, art, language, literature, place names and landscapes, the studies presented here reveal a world where the boundaries between humans, animals, monsters and objects were blurred and often permeable and where to represent the bestial could be to hold a mirror to the self. Michael D. J. Bintley is Senior Lecturer in Medieval Literature at Canterbury Christ Church University.
