 human *The Experience of Atheism: Phenomenology, Metaphysics and Religion* Claude Romano, Robyn Horner, 2021-05-06
 Religious and atheistic belief are presented anew in a volume of essays from leading phenomenologists in both France and
 the UK Atheism often presented as the negation of religious belief is here engaged with from a phenomenologically informed
 notion of experience The focus on experience sparks new debates in readings of belief faith and atheism as they relate to and
 complicate each other What unites the contributors is their relationship to phenomenology as it has developed in France in
 the wake of Heidegger and Husserl Leading French intellectuals from this context Jean Luc Nancy Quentin Meillassoux and
 Catherine Malabou amongst others contribute arresting ideas on atheistic faith the death of God and anarchic faith opening
 up new areas of understanding in a field whose parameters and core concepts are ever shifting Revealing the extent to which
 religious and atheistic belief must be seen to influence and on a fundamental level to co create one another the pluralistic
 society in which religious belief is counted as one option amongst many is given primacy The fact that religious faith has
 become not only optional but also in many contexts strangely alienated from society deeply modifies the experience of the
 believer as much as that of the non believer A focus on experience over and above belief moves us towards a mode of
 experiential knowledge which refuses to privilege the atheistic believer and deride the reality of religious belief *The

 Shannon Vallor, 2024-05-06 For many AI technology inspires hope for the future the promise of shared human flourishing and
 collective liberation from drudgery that defines the good life but always seems to elude our species Yet today s AI technology
 is forged from human generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors
 biases and failures of wisdom we are striving to escape To open new futures for ourselves with these tools is as misguided as
 gazing into a mirror while trying to climb an uncharted mountain At this crucial juncture for humanity and our planet we
 need something new from AI and more importantly from ourselves We need to find new hope not to surrender our greatest
 moral and intellectual ambitions to machines that have none but to renew those ambitions collectively for ourselves Shannon
 Vallor makes a wide ranging prophetic and philosophical case for what AI could be and what we can be with it She calls us to
 reclaim our human potential for moral and intellectual growth rather than losing sight of our shared humanity as we gaze
 dully into our AI mirrors *The Mirror of the World* Octave Uzanne, 1890 **Broken Mirrors** Joe Trotta, Zlatan
 Filipovic, Houman Sadri, 2019-11-07 Dystopian stories and visions of the Apocalypse are nothing new however in recent years
 there has been a noticeable surge in the output of this type of theme in literature art comic books graphic novels video games

TV shows etc The reasons for this are not exactly clear it may partly be as a result of post 9 11 anxieties the increasing incidence of extreme weather and or environmental anomalies chaotic fluctuations in the economy and the uncertain and shifting political landscape in the west in general Investigating this highly topical and pervasive theme from interdisciplinary perspectives this volume presents various angles on the main topic through critical analyses of selected works of fiction film TV shows video games and more
