## **Mining Very Large Databases With Parallel Processing:**

Mining Very Large Databases with Parallel Processing Alex A. Freitas, Simon H. Lavington, 1997-11-30 Mining Very Large Databases with Parallel Processing addresses the problem of large scale data mining It is an interdisciplinary text describing advances in the integration of three computer science areas namely intelligent machine learning based data mining techniques relational databases and parallel processing The basic idea is to use concepts and techniques of the latter two areas particularly parallel processing to speed up and scale up data mining algorithms The book is divided into three parts The first part presents a comprehensive review of intelligent data mining techniques such as rule induction instance based learning neural networks and genetic algorithms Likewise the second part presents a comprehensive review of parallel processing and parallel databases Each of these parts includes an overview of commercially available state of the art tools The third part deals with the application of parallel processing to data mining The emphasis is on finding generic cost effective solutions for realistic data volumes Two parallel computational environments are discussed the first excluding the use of commercial strength DBMS and the second using parallel DBMS servers It is assumed that the reader has a knowledge roughly equivalent to a first degree BSc in accurate sciences so that s he is reasonably familiar with basic concepts of statistics and computer science The primary audience for Mining Very Large Databases with Parallel Processing is industry data miners and practitioners in general who would like to apply intelligent data mining techniques to large amounts of data The book will also be of interest to academic researchers and postgraduate students particularly database researchers interested in advanced intelligent database applications and artificial intelligence researchers interested in industrial real world applications of machine learning

*Parallel and Distributed Processing* Jose Rolim, 2000-04-19 This volume contains the proceedings from the workshops held in conjunction with the IEEE International Parallel and Distributed Processing Symposium IPDPS 2000 on 1 5 May 2000 in Cancun Mexico The workshops provide a forum for bringing together researchers practitioners and designers from various backgrounds to discuss the state of the art in parallelism They focus on different aspects of parallelism from runtime systems to formal methods from optics to irregular problems from biology to networks of personal computers from embedded systems to programming environments the following workshops are represented in this volume Workshop on Personal Computer Based Networks of Workstations Workshop on Advances in Parallel and Distributed Computational Models Workshop on Par and Dist Comp in Image Video and Multimedia Workshop on High Level Parallel Prog Models and Supportive Env Workshop on High Performance Data Mining Workshop on Solving Irregularly Structured Problems in Parallel Workshop on Java for Parallel and Distributed Computing Workshop on Biologically Inspired Solutions to Parallel Processing Problems Workshop on Parallel and Distributed Real Time Systems Workshop on Embedded HPC Systems and Applications Reconfigurable Architectures Workshop Workshop on Formal Methods for Parallel Programming Workshop on Optics and Computer Science Workshop on Run Time Systems for

Parallel Programming Workshop on Fault Tolerant Parallel and Distributed Systems All papers published in the workshops proceedings were selected by the program committee on the basis of referee reports Each paper was reviewed by independent referees who judged the papers for originality quality and consistency with the themes of the workshops *Euro-Par' 99 Parallel Processing* Patrick Amestoy, Philippe Berger, Michel Dayde, Iain Duff, Valerie Fraysse, Luc Giraud, Daniel Ruiz, 2003-05-21 Euro-Par is an international conference dedicated to the promotion and advancement of all aspects of parallel computing The major themes can be divided into the broad categories of hardware software algorithms and applications for parallel computing The objective of Euro-Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline extending the frontier of both the state of the art and the state of the practice This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take up The main audience for and participants in Euro-Par are seen as researchers in academic departments government laboratories and industrial organisations Euro-Par's objective is to become the primary choice of such professionals for the presentation of new results in their specific areas Euro-Par is also interested in applications which demonstrate the effectiveness of the main Euro-Par themes There is now a permanent Web site for the series <http://brahms.fmi.uni-passau.de/cleuropar> where the history of the conference is described Euro-Par is now sponsored by the Association of Computer Machinery and the International Federation of Information Processing Euro-Par 99 The format of Euro-Par 99 follows that of the past four conferences and consists of a number of topics each individually monitored by a committee of four There were originally 23 topics for this year's conference The call for papers attracted 343 submissions of which 188 were accepted Of the papers accepted 4 were judged as distinguished 111 as regular and 73 as short papers

**Applications of Machine Learning** Prashant Johri, Jitendra Kumar Verma, Sudip Paul, 2020-05-04 This book covers applications of machine learning in artificial intelligence The specific topics covered include human language heterogeneous and streaming data unmanned systems neural information processing marketing and the social sciences bioinformatics and robotics etc It also provides a broad range of techniques that can be successfully applied and adopted in different areas Accordingly the book offers an interesting and insightful read for scholars in the areas of computer vision speech recognition healthcare business marketing and bioinformatics
