## **Minor Mlabri:**

*Minor Mlabri* Jørgen Rischel, 1995 The language described in this monograph is spoken by a small hilltribe in Northern Indochina Its existence has attracted considerable attention because of the legendary and intriguing primitiveness of the Mlabri or Spirits of the Yellow Leaves as they are traditionally called but reliable information about the cultural heritage and particularly the language is sparse This is true in particular of an ethnic subgroup whose culture and language are now close to extinction the group is referred to as the Minor Mlabri This monograph is based on field notes from 1988 and later years in which the author visited the Minor Mlabri The Mlabri are traditionally hunter gatherers and seem to have been so for a long time Until recently this was more or less the lifestyle of the small group under study here They now associate with Hmongs in remote villages because they were for several years trapped in the war zone between Laos and Thailand and the few survivors of the Minor Mlabri had to settle down in safer environments Deforestation has made it increasingly difficult for them to live their traditional life in the area where they belong Up to now the Mlabri language in all its varieties has been unknown

Roger Blench, Matthew Spriggs, 2003-09-02 Archaeology and Language I represents groundbreaking work in synthesizing two disciplines that are now seen as interlinked linguistics and archaeology This volume is the first of a three part survey of innovative results emerging from their combination Archaeology and historical linguistics have largely pursued separate tracks until recently although their goals can be very similar While there is a new awareness that these disciplines can be used to complement one another both rigorous methodological awareness and detailed case studies are still lacking in literature Archaeology and Language I aims to fill this lacuna Exploring a wide range of techniques developed by specialists in each discipline this first volume deals with broad theoretical and methodological issues and provides an indispensable background to the detail of the studies presented in volumes II and III This collection deals with the controversial question of the origin of language the

validity of deep level reconstruction the sociolinguistic modelling of prehistory and the use and value of oral tradition
