

# Uralic Languages

- Every European country is dominated by Indo-European speakers, except for three: Estonia, Finland, and Hungary.
- The Estonians, Finns, and Hungarians speak languages that belong to the Uralic family, first used 7,000 years ago by people living in the Ural Mountains north of the Kurgan homeland.

**Minor Uralic Languages** Ago Künnap,1994    Minor Uralic languages Ago Künnap,1994    Languages and Prehistory of Central Siberia Edward J. Vajda,2004-01-01 The twelve articles in this volume describe Yeniseic Samoyedic and Siberian Turkic languages as a linguistic complex of great interest to typologists grammarians diachronic and synchronic linguists as well as cultural anthropologists The articles demonstrate how interdependent the disparate languages spoken in this area actually are Individual articles discuss borrowing and language replacement as well as compare the development of language subsystems such as numeral words in Ket and Selkup Three of the articles also discuss the historical and anthropological origins of the tribes of this area The book deals with linguistics from the vantage of both historical anthropology as well as diachronic and synchronic linguistic structure The editor's introduction offers a concise summary of the diverse languages of this area with attention to both their differences and similarities A major feature uniting them is their mutual interaction with the unique Yeniseic language family the only group in North Asia outside the Pacific Rim that does not belong to Uralic or Altaic Except for the papers by Anderson and Harrison all of the articles were originally written in Russian and they are made available in English here for the first time

**The Finno-Ugric Republics and the Russian State** Rein Taagepera,2013-11-26 First Published in 2000 This text provides a survey of the peoples who speak Finno-Ugric languages and have titular republics or autonomous regions within the post Soviet Russian federation Their languages have set them apart from their Turkic and Russian neighbours and helped to preserve their distinct identity including their animist religious practices Previous works on this subject were written before the demise of the USSR so that information on the subject was screened by Soviet censors In particular this book explores the principal threats now facing these peoples as much environmental as political Although communism has gone the exploitation of natural resources threatens the region's ecology while the new rulers in the Kremlin seem set to continue their predecessors oppressive policies towards the Finno-Ugrians The book is written with commitment to the threatened human and political rights of these endangered peoples

**Contact-induced Perspectives in Uralic Linguistics** Ago Künnap,2000    Syntax over Time Theresa Biberauer,George Walkden,2015-02-27 This book provides a critical investigation of syntactic change and the factors that influence it Converging empirical and theoretical considerations have suggested that apparent instances of syntactic change may be attributable to factors outside syntax proper such as morphology or information structure Some even go so far as to propose that there is no such thing as syntactic change and that all such change in fact takes place in the lexicon or in the phonological component In this volume international scholars examine these proposals drawing on detailed case studies from Germanic Romance Chinese Egyptian Finnic Hungarian and Sámi They aim to answer such questions as Can syntactic change arise without an external impetus How can we tell whether a given change is caused by information structural or morphological factors What can microsyntactic investigations of changes in individual lexical items tell us about the bigger

picture How universal are the clausal and nominal templates cartography and to what extent is syntactic structure more generally subject to universal constraints The book will be of interest to all linguists working on syntactic variation and change and especially those who believe that historical linguistics and linguistic theory can and should inform one another

**Language Contact in South Central Siberia** Gregory D. S. Anderson,2005 The volume offers a description of the history and linguistic consequences of Russian Turkic contacts in two adjacent republics in the Altai Sayan region of south central Siberia viz Khakasia and Tuva First an overview of Russian Turkic contacts is offered Next follows a lengthy outline of the standardized form of Khakas to serve as a basis of comparison for the data discussed in subsequent chapters The complex linguistic history of Abakan the capital of Khakasia is addressed in particular what indigenous sources have contributed to the modern urban vernacular This is in large part the result of intense mixing and amalgamation of the diverse dialects of Khakas Further the role that Russian has played in shaping the modern speech variety attested in the capital city is examined in detail Finally Abakan Khakas data is compared with that of Kyzyl Tuvan spoken in the capital city of the significantly less Russianized Republic of Tuva The volume also includes a brief general discussion of the dynamics of language contact and structural change in languages under conditions of contact
