**A Mirror to Nature** Peter Knudtson,1991-01-01 **Canadian Book Review Annual** ,1991 Canadian Books in Print ,2003 **Scrutinizing Feminist Epistemology** Cassandra L. Pinnick,Noretta Koertge,Robert F. Almeder,2003 This volume presents the first systematic evaluation of a feminist epistemology of sciences power to transform both the practice of science and our society Unlike existing critiques this book questions the fundamental feminist suggestion that purging science of alleged male biases will advance the cause of both science and by extension social justice The book is divided into four sections the strange status of feminist epistemology testing feminist claims about scientific practice philosophical and political critiques of feminist epistemology and future prospects of feminist epistemology Each of the essays<sup>3 4</sup>most of which are original to this text<sup>3 4</sup> directly confronts the very idea that there could be a feminist epistemology or philosophy of science Rather than attempting to deal in detail with all of the philosophical views that fall under the general rubric of feminist epistemology the contributors focus on positions that provide the most influential perspectives on science Not all of the authors agree amongst themselves of course but each submits feminist theories to careful scrutiny *Scrutinizing Feminist Epistemology* provides a timely well rounded and much needed examination of the role of gender in scientific research

Canadiana ,1991 *Current Biography Yearbook* ,1995 **Books in Print** ,1991 **Language as a Scientific Tool** Miles MacLeod,Rocio G. Sumillera,Jan Surman,Ekaterina Smirnova,2016-01-29 Language is the most essential medium of scientific activity Many historians sociologists and science studies scholars have investigated scientific language for this reason but only few have examined those cases where language itself has become an object of scientific discussion Over the centuries scientists have sought to control refine and engineer language for various epistemological communicative and nationalistic purposes This book seeks to explore cases in the history of science in which questions or concerns with language have bubbled to the surface in scientific discourse This opens a window into the particular ways in which scientists have conceived of and construed language as the central medium of their activity across different cultural contexts and places and the clashes and tensions that have manifested their many attempts to engineer it to both preserve and enrich its function The subject of language draws out many topics that have mostly been neglected in the history of science such as the connection between the emergence of national languages and the development of science within national settings and allows us to connect together historical episodes from many understudied cultural and linguistic venues such as Eastern European and medieval Hebrew science **Science and the Social Responsibility of Natural Scientists** Hendrik Verhoog,1980
