Interpreting Chopin: Analysis and Performance Alison Hood, 2017-05-15 Music theory is often seen as independent from even antithetical to performance While music theory is an intellectual enterprise performance requires an intuitive response to the music But this binary opposition is a false one which serves neither the theorist nor the performer In Interpreting Chopin Alison Hood brings her experience as a performer to bear on contemporary analytical models She combines significant aspects of current analytical approaches and applies that unique synthetic method to selected works by Chopin casting new light on the composer's preludes nocturnes and barcarolle An extension of Schenkerian analysis the specific combination of five aspects distinguishes Hood's method from previous analytical approaches These five methods are attention to the rhythms created by pitch events on all structural levels a detailed accounting of the musical surface strict use of analytical notation following guidelines offered by Steve Larson a continual concern with what have been called strategies or premises and an exploration of how recorded performances might be viewed in terms of analytical decisions or might even shape those decisions Building on the work of such authors as William Rothstein Carl Schachter and John Rink Hood's approach to Chopin's oeuvre raises interpretive questions of central interest to performers
