Thomas A. Ohanian

Nonlinear A Field Guide To Digital Video And Film Editing:

Nonlinear Michael Rubin, Ron Diamond, 2000 *Nonlinear* now in its 4th edition is an easy to understand handbook about the popular world of digital nonlinear editing. It's written in nontechnical language for both professionals and students as well as for interested bystanders. Profusely illustrated. The first edition was designed for professionals in Hollywood's film and video industry to bridge the chasm between film editors older non-technological mechanical videotape editors younger highly technical electronic and computer users prosumers cost-conscious digital in casual language. Today *Nonlinear* has not only penetrated the professional industry but has been expanded for consumer use. Widely used in colleges universities and professional organizations. Although nonlinear editing technology began to explode in 1991 nonlinear systems had already been around for almost 5 years. *Nonlinear* became the Rosetta Stone of the industry it was a universal translator between film and video video and computer computer and film. It still covers virtually everything anyone would want to know about the new world of electronic post production without the geeky mumbo jumbo that characterizes most professional texts. While the book is useful for anyone investigating or wishing to purchase a digital editing system it is not meant to be a buyer's guide. It is designed not to go out of date every time a new new product is introduced or software release comes out. It is about essentials Fundamentals Concepts And language. With over 25 000 copies in print *Nonlinear* is the best selling textbook on nonlinear editing in the world today. **Nonlinear** Michael Rubin, 2000 **The Aesthetics of Digital Montage** Marc

Furstenau, 2025-10-01 Tracing the recent changes to the technology of film editing this book offers an account of the aesthetics of digital montage. It is commonly argued that the changes to the technical apparatus of editing the emergence of new systems for digital editing have altered the basic identity or ontology of the cinema as an art. Such claims it is argued in this book are based on a misunderstanding of the relation between technology and technique and more generally between the technical and the aesthetic. Applying recent theories of art and employing specific concepts from philosophical aesthetics an account of cinematic art is offered that can better accommodate the kinds of technical changes that have occurred in recent decades with the advent of computer technology in the cinema. An aesthetics of digital montage is presented as part of a more general proposal for a theory of technical change in the cinema. **Software Literacy** Elaine Khoo, Craig Hight, Rob Torrens, Bronwen Cowie, 2017-11-24 This book explores the notion of software literacy a key part of digital literacy which all contemporary students and citizens need to understand. Software literacy involves a critical understanding of how the affordances and conceptual approaches of everything from operating systems creative apps and media editors to software based platforms and infrastructures work to inform and shape the ways we think and act. As a cultural artefact programming code plays a role in reproducing reinforcing and augmenting existing cultural practices as well as generating completely new coded practices. A proposed three tier framework for software literacy is the focus for a two year empirical investigation into how tertiary students become more literate about the nature and implications of software they encounter as part of their
