Muscles Molecules And Movement:

Muscles, Molecules and Movement James Reginald Bendall,1969 **Muscles, Molecules and Movement** J. R. Bendall,1969 **Muscles & Molecules** Gerald H. Pollack,1990 An award winning book that topples the widely accepted edifice of understanding on how muscles contract replacing it with a simpler construct that better fits the evidence This is a beautifully produced single authored text by one of our more thoughtful if unconventional authorities on the mechanism of muscular contraction Clearly and elegantly written and with a charm and grace not often seen in modern scientific writing

Muscle: Molecular Mechanisms Andrea A. Vasconsuelo,2019-06-03 This monograph focuses on the actions exerted by sex hormones 17 estradiol and testosterone in skeletal muscle tissue An important consideration of this volume is the fact that both estrogen receptors ERs and androgen receptors ARs are ubiquitously expressed and as a result steroid hormones affect growth and different cell functions in several organs Moreover ERs and ARs may have a non classical pattern of intracellular localizations raising complexity to the functional roles of estradiol and testosterone Readers will find key information about the role of sex hormones in mitochondrial physiology and their relation with ageing apoptosis and sarcopenia Chapters integrate important points with the latest information on the subject including work of leading researchers studying the cellular and molecular mechanisms underlying the age linked changes in muscle tissue while highlighting the role of satellite cells Furthermore the book presents a chapter about phytoestrogens compounds which are structurally very similar to estrogen 17 estradiol and their selective action on sex steroid receptors specifically they have a higher affinity for ER receptors than ER receptors The book is recommended reading for scientists and clinicians involved in the field of medical and health sciences as well as for scholarly readers students of biochemistry and medicine who are interested in the molecular mechanism of cellular apoptosis regulated by steroid hormones **Life in Motion** John Gray McKendrick,1892
