Jonathan Harvey, Michael John Downes

Music And Inspiration:

Music and Inspiration Jonathan Harvey, Michael John Downes, 1999 Inspiration is the factor common to all composers throughout musical history yet this is the first book to examine its source Jonathan Harvey one of Britain's foremost composers here brings a specialist's insight to the relationship between the source of inspiration and the act of composition

Becoming a Real Musician Robert H. Woody, 2019-10-11 Nobody is born a musician. Rather, people become musical. They do so through the right experiences as children and with the right kind of support from the adults in their lives. Most teachers and parents believe that music can be a powerful a gift to kids. Ideally, it becomes a lifelong gift rather than merely a pastime of childhood to be reminisced about later. Unfortunately, not all music educational experiences produce a lasting musicianship. This book shares how learning experiences can be made more relevant practical and real world for young people studying music. With such experiences, kids can be on their way to becoming real musicians defined as people whose musical skills allow them to lead musically active lives whether music making is their profession or a personally fulfilling part of their leisure time.

Music Ivan Hewett, 2005-04-29 The word music in the early 21st century means many things. It means Mozart in the elevator 50s pop songs on TV adverts Finnish folk songs on Nokia phones. It means inflammatory Serbian nationalist song ancient Coptic Church chant Berlin electronica Wynton Marsalis. Given this bewildering abundance, how can we speak of a single thing called music? This book will argue that we can. More than that, it will argue that a vast area of cultural practice is at risk of vanishing behind the deafening roar of all those dead simulations of music that fill the airwaves. In this passionately argued and convincing book, Ivan Hewett reclaims the unique place of music should have in our culture in its own right.

Music & Letters, 1919 Dreaming and Thinking in Music Bruce Adolphe, 2025 Dreaming and Thinking in Music provides an innovative method for teachers and students of music composition to practice responding to inspiration and for readers interested in musical creativity to explore how composers think. Unlike conventional texts on music composition, this book is not about the techniques of writing melody, harmony, counterpoint, and rhythm but about the more elusive and rarely discussed problems of how to get ideas and then how to follow up with the appropriate techniques to realize those ideas. The exercises in the book prepare the reader for getting, recognizing, and seizing moments of inspiration and musical visions by providing a variety of images and concepts that prompt imaginative musical thinking. Essays appear throughout the book to introduce the exercises and explore relevant topics such as dreams, improvisation, the concept of a personal voice, composing based on lived experiences, and the influences of visual art, poetry, film, theater, and science. Dreaming and Thinking in Music is a natural extension of concepts and practices in my previous books *The Mind's Ear*, *Exercises for Improving the Musical Imagination for Performers, Composers, and Listeners* (OUP, third edition 2019) and *Visions and Decisions: Imagination and Technique in Music Composition* (Cambridge 2023). This new book combines the research and thinking in both books and uses the exercise-driven approach of *The Mind's Ear* making it a useful book for
