A Dictionary of Music and Musicians (A.D. 1450-1880) by Eminent Writers, English and Foreign George Grove,1880 Music in Words Trevor Herbert,2009-02-12 Music in Words is a compact guide to researching and writing about music addressing all the issues that anyone who writes about music from students to professional musicians and critics may confront when putting together anything from brief program notes to a lengthy thesis The book is a writing guide and a reference manual in one the first part a how to section offers a clear explanation of the purpose of music research and how it is to be done including basic introductions to the most necessary tools for musical inquiry with special emphasis on strategic use of the internet and how they can be accessed and used The second part is a compendium of information on style and sources for quick reference including a straightforward presentation of the purpose and use of citation and reference systems as they are applied to and in music As a whole the volume gives readers a clear picture of how to write about music at different levels and for different purposes in a handy thoroughly cross referenced format This American edition has been thoroughly revised and expanded and features an extensive section on writing for the Internet and new sections on writing for jazz popular music world musics and ethnography Additionally a companion website presents a broad range of writing samples and links to key resources Hollis Dann Music Course Hollis Dann,1912 **How to Write Music** Clement A. Harris,2015-11-24 It is reasonable to expect that a musician shall be at least an accurate and legible writer as well as a reader of the language of his Art The immense increase in the amount of music published and its cheapness seem rather to have increased than decreased this necessity for they have vastly multiplied activity in the Art If they have not intensified the necessity for music writing they have increased the number of those by whom the necessity is felt Intelligent knowledge of Notation is the more necessary inasmuch as music writing is in only a comparatively few cases mere copying Even when writing from a copy some alteration is frequently necessary as will be shown in the following pages requiring independent knowledge of the subject on the part of the copyist Yet many musicians thoroughly competent as performers cannot write a

measure of music without bringing a smile to the lips of the initiated Many performers will play or sing a note at sight without hesitation which asked to write they will first falter over and then bungle at least by writing it at the wrong octave The admirable working of theoretical examination papers is sometimes in ridiculous contrast with the puerility of the writing Psychologists would probably say that this was because conceptual action is a higher mental function than perceptual in other words that recollection is harder than recognition The remedy is simple Recognition must be developed till it becomes recollection the writing of music must be taught concurrently with the reading of it

Amateur Media

Dan Hunter,Ramon Lobato,Megan Richardson,Julian Thomas,2012-10-12 The rise of Web 2 0 has pushed the amateur to the forefront of public discourse public policy and media scholarship Typically non salaried non specialist and untrained in media production amateur producers are now seen as key drivers of the creative economy But how do the activities of citizen journalists fan fiction writers and bedroom musicians connect with longer traditions of extra institutional media production This edited collection provides a much needed interdisciplinary contextualisation of amateur media before and after Web 2 0 Surveying the institutional economic and legal construction of the amateur media producer via a series of case studies it features contributions from experts in the fields of law economics and media studies based in the UK Europe and Singapore Each section of the book contains a detailed case study on a selected topic followed by two further pieces providing additional analysis and commentary Using an extraordinary array of case studies and examples from YouTube to online games from subtitling communities to reality TV the book is neither a celebration of amateur production nor a denunciation of the demise of professional media industries Rather this book presents a critical dialogue across law and the humanities exploring the dynamic tensions and interdependencies between amateur and professional creative production This book will appeal to both academics and students of intellectual property and media law as well as to scholars and students of economics media cultural and internet studies
