Inside, you will find: How to choose a language; How to start learning from zero; How to learn even the hardest languages with the conquer the castle method; How the brain memorizes words; How to learn grammar and the right approach for learning and using grammar; Special techniques including a technique to learn 3 languages at the same time; A trick to use if you find it hard to learn a new alphabet; How to use your phone, your chats, and technology to learn languages without traveling abroad; How to learn a language if you cannot speak with native speakers; The important elements to consider when learning a language; Customizing your learning based on your own nature and much more. **Second Language Learning Data Analysis** Susan M. Gass, Antonella Sorace, Larry Selinker, 2013-05-13 The purpose of this workbook is to provide students with practice in analyzing second language data For the student of second language learning hands on experience with actual data is essential in understanding the processes involved in learning a second language Working through exemplars of the kinds of interlanguages that learners do and do not create brings about a clearer understanding of the principles underlying these interlanguages as well as the universal principles of language learning those that are independent of particular languages and interlanguages The goal in this workbook is to present data organized in such a way that by working through pedagogically presented data sets students are led to a discovery and understanding of theoretical and or methodological issues In addition they acquire the ability to interpret data and to begin to draw conclusions from them The authors intend that students should go from the data to a conclusion that includes a 3 part statement what else you should want to know about these data why this specifically and not something else and how one can empirically research what you want to find out This sequence of questions forces students to constantly keep in mind the important question of falsification What kind of data would it take to falsify the particular conclusions the students come to As with the earlier edition of this workbook Sorace Gass a three part set workbook manual tapes is also available
