Optimism The Biology Of Hope:

Optimism Lionel Tiger,1980 Handbook of Human Development for Health Care Professionals Kathleen M. Thies,John F. Travers,2006 Handbook of Human Development provides health care professionals with a current comprehensive and practical overview of human development The goal for each chapter is to offer a review of the literature on that particular subject and goes on to analyze the current theory and research in a particular field in light of the practical applications for readers

Hope Amidst Conflict Oded Adomi Leshem,2023-10-13 What is the role of hope in the lives of individuals and collectives mired in conflict and political unrest How do political elites utilize hope and skepticism to mobilize citizens and how does hope manifest itself at the grassroots level Under what conditions can hope proliferate in the seemingly hopeless situations of intractable conflicts and why do despair and fear often prevail Is being hopeful necessarily a good thing or are there situations when hope should be avoided or at least minimized These questions are not only thought provoking but also highly relevant to the reality of millions of people around the world struggling for justice equality and peace

Hope in Health Alan Petersen,2015-05-27 Health professionals have shown a growing interest in the therapeutic value of hope in recent years However hope has been examined mainly from psychological and biomedical perspectives Importantly Hope in Health explores how hope manifests and is sustained in various arenas of health medicine and healthcare

A Journey into the Human Experience of Incurable Disease Malcolm de Roubaix,2023-06-05 Incurable disease is a natural phenomenon inherent to the human condition This book critically investigates the uniquely human experience of and response to illness and treatment which affects the body the mind and the very core of human existence and identity Uncertainties regarding the outcomes of laboratory and other investigations that aid in the diagnosis and assessment of disease exacerbate the apprehension inherent to the diagnosis of incurable disease An excessively scientific approach may disregard the suffering patient The book begins by analysing the nature meaning and significance of hope in the context of disease and goes on to reflect on the language of medicine and the role of emotion ideology and politics in disease treatment and research The epilogue reflects on healing as distinct from physical cures Without hope there is no future without healing no holistic recovery The final chapters are devoted to the end of life period of this journey This book is a revision extension and reconceptualization of the original Afrikaans publication Hoop Heling en Harmonie Dink Nuut Oor Siekte en Genesing winner of the 2021 Andrew Murray Prize for Theological Publications
