

# ADVANCED OPTOMETRIC TOOLS LEAD THE WAY

Just 6/6 N6 is not enough. Sanjay Mehta from Tower Optics talks about why it's important to care of our eyes. He shares stories and explains how using new tools can help keep our vision healthy

India's population stands at around 1.25 billion and an estimated 800000 opticians will be added every day in the year 2020. Out of the total current population, around 8 million are blind. Half of it being preventable.

In our country, as per the latest data available, the current number of Registered Optometrists stands at about 28000 and that of Opticians stands at about 50000. 18 Year Diagnosed) and 200000 (17 Year Prognosed) and predominantly 80% optician stores.

Similarly the first place where go to for an eye checkup is an optical store because of its convenience in accessing the services, making it the primary place to detect many eye conditions and diseases like Cataract, Diabetic Retinopathy, Age Related Macula

Degeneration, which often causes early sight and symptoms.

Most opticians employ an automated just to detect refractive errors like Myopia, Hyperopia, astigmatism, and presbyopia to increase the spectacle and contact lenses. The common question from an optician is who should I choose for my fitting journey in my practice? The answer is why not.

A 40-year-old patient came to my clinic with a common complaint of not being able

to see objects clearly. On examination, she had only negligible distance correction with visual acuity of 6/6 and with normal presbyopia correction of around 1.25 addition, making her see her clearly.

In normal circumstances, the patient's eye examination and vision would have ended by prescribing and dispensing the spectacles, but not in my practice. The patient's anterior segment was checked with 6 mm slit lamp which showed a shallow anterior chamber

intraocular pressure was checked with a standard tonometer (tonometer) which showed very high intraocular pressure in both eyes with a wide difference between the two and her retina showed a high cup to disc ratio. Her visual field fully tested with glaucoma changes. The patient was immediately referred to an ophthalmologist and her eyes were tested. The doctor gave early intimation that there is an urgent need among the optical stores across our country to keep about these changes in the

optical stores what an eye checkup is all about.

In today's digital age, where screen time has become a significant part of daily life, individuals are increasingly prone to digital eye strain and other related issues. Comprehensive eye checkups can assess the impact of prolonged screen use on vision and provide guidance on managing potential problems. Additionally, these examinations can aid in recognizing early signs of eye diseases such as macular degeneration, diabetic retinopathy, and glaucoma.

Different age groups have different eye care needs. Children may need vision
