Orange Black:

Ballynahatty Barrie Hartwell, Sarah Gormley, Catriona Brogan, Caroline Malone, 2023-08-15 Just six miles from the center of Belfast County Down on the plateau of Ballynahatty above the River Lagan is one of Ireland's great Neolithic henge monuments the 200 m wide Giant's Ring. For over a thousand years this area was the focus of intense funerary ritual seemingly designed to send the dead to their ancestors and secure the land for the living. Scattered through the fields to the north and west of the Ring are flat cemeteries standing stones, tombs, cists and ring barrows ancient monuments that were leveled by the plough when the land was enclosed in the 18th and 19th centuries. A great 90 m long timber enclosure with an elaborate entrance and inner temple was first observed through crop marks in aerial photos. Excavation of the site between 1990-1999 revealed a complex structure composed of over 400 postholes many over 2 m deep. This was a building in the grand style elegantly designed to control space, views and access to an inner sanctum containing a platform for exposure of the dead. By 2550 BC the timber temple had been swept away in a massive conflagration and the remains dismantled. Ballynahatty was one of the last great public ceremonial enterprises known to have been constructed by the Neolithic farmers in Northern Ireland an enterprise proclaiming their enigmatic religion, ancestral rights and territorial aspirations. This report reconstructs the remarkable building complex and explains the sophistication and organization of its construction and use. The report sets the site and excavation in the wider development of the Ballynahatty landscape and its study to the present day. Shipboard Power Systems Design and Verification Fundamentals Mohammed M. Islam, 2018-05-31 The only book that covers fundamental shipboard design and verification concepts from individual devices to the system level. Shipboard electrical system design and development requirements are fundamentally different from utility based power generation and distribution requirements. Electrical engineers who are engaged in shipbuilding must understand various design elements to build both safe and energy efficient power distribution systems. This book covers all the relevant technologies and regulations for building shipboard power systems which include commercial ships, naval ships, offshore floating platforms and offshore support vessels. In recent years offshore floating platforms have been frequently discussed in exploring deep water resources such as oil, gas and wind energy. This book presents step by step shipboard electrical system design and verification fundamentals and provides information on individual electrical devices and practical design examples along with ample illustrations to back them. In addition, *Shipboard Power Systems Design and Verification Fundamentals* Presents real world examples and supporting drawings for shipboard electrical system design. Includes comprehensive coverage of domestic and international rules and regulations e.g. IEEE 45, IEEE 1580. Covers advanced devices such as VFD Variable Frequency Drive in detail. This book is an important read for all electrical system engineers working for shipbuilders and shipbuilding subcontractors as well as for power engineers in general.
