Buddhism Beyond the Monastery International Association for Tibetan Studies. Seminar, 2009 Monasteries have been the locus classicus of the academic investigation of Tibetan religions This volume seeks to balance this emphasis with an exploration of the diverse religious specialists who operate outside of the monastery in Tibet and along the Himalayan belt The articles collected here depict Tantric professionals visionaries village lamas spirit mediums and female religious leaders whose loyalties reside in the noncelibate sphere but whose activities have had a significant impact on Tibetan religion Using methodologies drawn from anthropological and textual scholarship these seven essays bolster our understanding of religious practices and their performers beyond the monasteries of Central and Eastern Tibet Bhutan and India from historical times to the present day **Selves in Time and Place** Debra Skinner, Alfred Pach, Dorothy C. anthropology has turned to accounts of persons in history history in persons focusing on how individuals and groups as agents both fashion and are fashioned by social political and cultural discourses and practices In this approach power agency and history are made explicit as individuals and groups work to constitute themselves in relation to others and within and against sociopolitical and historical contexts Contributors to this volume extend this emphasis drawing upon their ethnographic research in Nepal to examine closely how selves identities and experience are produced in dialogical relationships through time in a multi ethnic nation state and within a discourse of nationalism The diversity of peoples recent political transformations and nation building efforts make Nepal an especially rich locale to examine people s struggles to define and position themselves But the authors move beyond geographical boundaries to more theoretical terrain to problematize the ways in which people recreate or contest certain identities and positions Various authors explore how people positioned by gender ethnicity and locale use cultural genres to produce aspects of identities and experiences they examine how subjectivities agencies and cultural worlds co develop and are shaped through engagement with cultural forms and they portray the appropriation of multiple voices for self and group formation As such this collection offers a richly textured and complex accounting of the mutual constitution of selves and society *Soundings in Tibetan Medicine* International Association for Tibetan Studies.
