## **Organ Building For Amateurs:**

**Organ Building for Amateurs** James Zimmerhoff, Mark Wicks, 2017-09-17 I must in the first instance warn the reader that it is not written with the intention of dealing exhaustively with organ building generally but as its title implies only with that particular phase which comes within the means and scope of an intelligent amateur workman Therefore such refinements as electric and pneumatic actions not being required in small instruments find no place in this work but everything of interest to a home worker is touched upon in a thoroughly practical manner There are many works on the subject to which builders purchasers or general readers may resort for information respecting organs but the instructions contained in most of these works being limited to general and often vague description are of little service to an ordinary amateur desirous of building the instrument himself as in most cases the idea of building an organ at home is taken up by persons having little knowledge of the construction of the instrument which they so ardently desire to possess It is indeed rather surprising that there is not a larger supply of literature dealing with this Subject from an amateur's point of view for it is a matter which is constantly claiming the attention of young men of mechanical proclivities and also one which exercises an astonishing and peculiar fascination

Vf PREFACE over them But beyond isolated papers in magazines and the little manual of the Rev W E Dickson there does not appear to be anything which can rightly be considered as meeting the requirements of persons of the class referred to It is with the object of supplying this want that I have been induced to compile the little manual which now seeks the suffrages of home workers As an amateur organ builder I may fairly claim to have some knowledge of the necessities of that class and of the difficulties which beset them at every turn It has been my endeavour to smooth away those difficulties by describing every part of the instrument in the fullest detail and by supplementing the instructions wherever practicable with carefully drawn illustrations The method of making pipes of paper which is an invention of my own will I trust prove a boon to amateurs especially those of limited means as by making pipes of this material the most expensive item in the cost of the instrument is reduced to a comparatively nominal sum I do not think I could adduce better testimony of their efficiency than the fact that a practical organ builder who is quite unknown to me has thought it worth his while to take up the manufacture of these pipes and to enlarge his workshops for the purpose I would add that the care patience and perseverance devoted to building even a small organ at home must necessarily afford most valuable training to young men and the moral value of the instrument itself in a home where children are growing up cannot I think be over estimated

**Organ Building for Amateurs** Mark Wicks, 2013-08 Organ Building for Amateurs a practical guide for home workers containing specifications designs and full instructions for making every portion of the instrument with over two hundred illustrations and explanatory diagrams By Mark Wicks Contents I Tools and Appliances Specifications New Method of Making Pipes II Wood Pipes III Pipes of Metal casting Bench and Casting Box Metal for Pipes Melting Metal Necessary Tools Scale for Cutting Metal for Pipes Formation of Sheet Metal into Pipes IV Reed Pipes V Sound board Wind

no place in this work but everything of interest to a home worker is touched upon in a thoroughly practical manner There are many works on the subject to which builders purchasers or general readers may resort for information respecting organs but the instructions contained in most of these works being limited to general and often vague description are of little service to an ordinary amateur desirous of building the instrument himself as in most cases the idea of building an organ at home is taken up by persons having little knowledge of the construction of the instrument which they so ardently desire to possess About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
