Stowell, Daune West, James G. Howell, 2012-12-06 As we approach the end of the 20th century we can look back upon the achievements that have been made in a variety of human endeavours with pride Enormous strides have been made to improve the quality of life of millions of people through the application of the scientific discoveries made during this and past centuries The 20th century will be remembered as much for the mass exploitation of scientific discovery as for the discoveries themselves The technological age has meant that the human being is able to contemplate activities which defy nature For example some of the work involved in the preparation of these proceedings has been done whilst travelling at over 500 miles per hour seven miles above the surface of the earth It is not difficult to conjecture about the effect that this relatively recent technology has had upon a number of systems Air transportation has provided a number of benefits including such disparate examples such as enabling holidays famine relief and the cross fertilisation of cultural practices from other lands Equally there have been undesirable effects such as enabling the means of mass destruction interference in other cultures and the speedy transportation of disease Moreover the physical presence of the aeroplane itself represents the consumption of fossil fuels a source of pollution and a change in the way think about life The view expressed here is of course the view of an inhabitant of the western world

STRATEGIC MANAGEMENT OF MODERN HOSPITALS BALASUBRAMANIAN MAHADEVAN, 2023-03-09 Messy galleries oil painted walls stained bathrooms inefficient staff dim light and noise This is how we identify a typical Indian hospital Hospital chains are indeed making their presence felt but for an average Indian branded healthcare is still a luxury The scenario has to change The 21st century marks the incoming of technology where everything is changing Hospitals are no exception However the problem is with the strategic perspective You may find lots of books or articles about technology but nobody takes it down to the level of how A strategic framework for modern hospitals is missing This realisation is

important as healthcare is one of the basic needs of humankind and especially in India it is on the lowermost ranking on the priority list One needs to think and know about how strategy is important in making modern healthcare happen in India

To improve on an award winning book poses a major challenge to its authors The authors of this book took the challenge head on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa and the rest of Africa The findings of this study which dealt with current and near future management issues as well as classical and contemporary thinking about management were used as the blueprint for the updating of this book After placing management in context the authors deal with the knowledge skills and dispositions required of managers to perform the management functions of planning organising leading and controlling in a volatile business world Examples of how the functions are applied in practice are cited throughout the book These examples refer mainly to South African organisations and situations that managers in South Africa and Africa have to deal with to create and sustain a competitive advantage for their organisations The book endeavours to break down the silo effect of seeing the management functions as separate activities This is done by continuously placing the management function at hand in a bigger context This enables learners of management to assess the implications of management decisions on different people processes systems and so on that make up the organisation
