R. Ramanathan, 2009-03. This research study seeks to understand the nature of organisational change with respect to offshore outsourcing of information technology services in a multinational pharmaceutical company and to examine the effectiveness of approaches used to manage this change so that lessons may be drawn from these experiences. Despite the abundant literature on effective organisational change management the key factors that need to be managed properly at different stages of the offshore outsourcing process are not well understood. The research adopts a processual view to paint a broad picture of the issues involved in these different stages. A generic process model of change based on the review of the change literature was first developed to represent how change was intended to occur. This model focuses on the following four stages in the change process context diagnosis and planning implementation and institutionalisation. The research employs an interpretive case study approach and draws on fieldwork from three independent information systems departments cases of the company where offshore outsourcing programmes were implemented. Qualitative data from semi structured interviews direct observation and document analysis are analysed by

applying the generic process model to produce a detailed account of the way in which change was managed in the case organisations. The findings reveal that a combination of contextual factors both external and internal to the company influenced the adoption and use of offshore outsourcing in the case organisations. Externally the economic forces were found to be the main catalyst for the change while internally the role of the executive leadership and the lack of internal resources further explain the motivations behind the adoption of offshore outsourcing. The study illustrates that achieving successful outcomes from offshore outsourcing activities critically depends on the organisation adequately addressing a number of factors such as conveying a sense of urgency developing and communicating the vision identifying the benefits of change and how they will be delivered generating short term wins providing education and training developing a fit between the change and organisational culture etc throughout the change process. The findings also highlight the effects of offshore outsourcing on the case organisations including change in job roles and responsibilities and organisational learning activities that enable corrective actions to improve change management efforts. An important contribution of this research is the development of a model providing a more comprehensive understanding of the change process associated with the implementation of offshore IT outsourcing. Recommendations for policy makers and change managers to improve change management practice based on the research findings as well as recommendations for further research form a significant part of the conclusions.

*The Limits of Organizational Change* Herbert Kaufman,2017-07-12 The environment of modern organizations is so complex and volatile that we take for granted that organizational change is necessary for organizational survival Yet the literature on organizations has for years described manifold obstacles to such change First published in 1971 this book extracts from that literature and from experience a comprehensive yet concise overview of those barriers Because these elements of the analysis are as valid now as when they were originally written The Limits of Organizational Change is still widely read and cited nearly a quarter century later From the premises of this argument Kaufman drew a number of conclusions about organizational survival and extinction age and size centralization and decentralization and organizational evolution Subsequent research and reflection induced him to refine and modify some of those inferences The modifications are spelled out in a new preface that gives fresh relevance to his findings and his conjectures Yet The Limits of
