Orangutan Odyssey Biruté Marija Filomena Galdikas, Nancy Erickson Briggs, 1999-10 With this pictorial essay Galdikas brings to life her work with these shy endangered red apes Taking readers to her remote rainforest headquarters Galdikas draws on Karl Ammann's unparalleled photographs to present intimate portraits of the individual orangutans she's come to know offers rare glimpses of their behavior in the wild

**Orangutans** Serge A. Wich, Uci Suci Utami Atmoko, Tatang Mitra Setia, Carel P. van Schaik, 2010-01-07 This book describes one of our closest relatives the orangutan and the only extant great ape in Asia It is increasingly clear that orangutan populations show extensive variation in behavioural ecology morphology life history and genes Indeed on the strength of the latest genetic and morphological evidence it has been proposed that orangutans actually constitute two species which diverged more than a million years ago one on the island of Sumatra the other on Borneo with the latter comprising three subspecies This book has two main aims The first is to carefully compare data from every orangutan research site examining the differences and similarities between orangutan species subspecies and populations The second is to develop a theoretical framework in which these differences and similarities can be explained To achieve these goals the editors have assembled the world's leading orangutan experts to rigorously synthesize and compare the data quantify the similarities or differences and seek to explain them Orangutans is the first synthesis of orangutan biology to adopt this novel comparative approach It analyses and compares the latest data developing a theoretical framework to explain morphological life history and behavioural variation Intriguingly not all behavioural differences can be attributed to ecological variation between and within the two islands relative rates of social learning also appear to have been influential The book also emphasizes the crucial impact of human settlement on orangutans and looks ahead to the future prospects for the survival of critically endangered natural populations

**Undaunted** Anita Silvey, 2019 As a young scientist Galdikas had a mission to find and study the elusive orangutans of Borneo's rain forest to help protect this amazing and elusive species Award winning author Silvey explores the life and legacy of this incredible and little known primatologist Full color
