Viruses and Human Disease Ellen G. Strauss, James H. Strauss, 2002-03-12 This is the first text to examine the connection between virology and human disease It is also the first book to integrate basic virology with pathophysiological conditions By contrast most virology textbooks focus on the molecular biology involved without adequate reference to physiology Viruses and Human Disease is four color throughout and contains clearly labeled figures and tables Key Features Provides a concise overview of animal viruses emphasizing those causing diseases in humans Integrates discussion of molecular biology epidemiology and the history of human viruses Presents treatment of prions gene therapy and vaccine development Illustrated in color by an expert virologist Includes world maps depicting the current distribution of existing and newly emerging viruses

Cap-Independent Translation Peter Sarnow, 2012-12-06 This volume offers comprehensive reviews on the mechanism of cap independent translation of viral and cellular mRNA molecules The chapters include recent findings on cap independent translation by internal ribosome binding of picornaviral hepatitis C viral and certain cellular mRNAs and discuss the mechanisms underlying cap independent translation of adenoviral and heat shock mRNAs Using new technologies in the field new features of the eukaryotic translational apparatus have been

uncovered and their roles in translational initiation and its regulation are probed *ISI Atlas of Science Institute for Scientific Information, 1981* *Emerging Infectious Diseases, 2004* *The Plant Viruses* R.G. Milne, 1988 The original aim of this book was to cover different aspects of the traditionally filamentous potex carla poty clostero and capilloviruses The title The Filamentous Plant Viruses seemed the only suitable one but it has led us to discuss also the quite different filamentous viruses of the rice stripe group recently officially named the tenuivirus group which otherwise indeed might not have been conveniently covered in any volume of this series The question must be asked What is there new that justifies the presentation of a book of this kind An outline of the answer may be Among the traditional filamentous viruses much progress has been made in elucidating the physical structure of potexvirus particles and this work serves as an excellent model for discussion of and future experiments on the poty carla clostero and capilloviruses which have comparable structures although they are more difficult to manipulate Work on the structure and strategy of the genomes of poty viruses is however relatively advanced and at a very interesting stage The helper component that assists the aphid transmission of potyviruses has also recently received considerable attention although the more we know about that the less seems clear about the aphid transmission of the carlaviruses and clostroviruses which apparently neither possess nor require a helper component Virology & AIDS Abstracts, 1994 International Directory of Cancer Institutes and Organizations, 1990
