New Urban Spaces Neil Brenner, 2019-05-24 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In *New Urban Spaces* Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate
