New Wave Readers:

The British Comic Book Invasion Jochen Ecke, 2018-12-06 What makes a successful comics creator How can storytelling stay exciting and innovative How can genres be kept vital Writers and artists in the highly competitive U S comics mainstream have always had to explore these questions but they were especially pressing in the 1980s As comics readers grew older they started calling for more sophisticated stories They were also no longer just following the adventures of popular characters writers and artists with distinctive styles were in demand DC Comics and Marvel went looking for such mavericks and found them in the United Kingdom Creators like Alan Moore Watchmen Saga of the Swamp Thing Grant Morrison The Invisibles Flex Mentallo and Garth Ennis Preacher migrated from the anarchical British comics industry to the U S mainstream and shook up the status quo yet came to rely on the genius of the American system **Wireless World**

Techno-Nationalism Fontaine Lien, 2025-11-11 This book is a comprehensive examination of contemporary Chinese science fiction sf under the framework of Chinese techno nationalism aimed at introducing the genre to both general and academic readers and providing new in depth perspectives on work that has been published in the early twenty first century While China has made technology an important pillar of its external power projection and internal management strategy this book approaches contemporary Chinese sf as a complicated mode of both aspiration and subversion within the sphere of techno

nationalistic discourse Using a general theoretical framework informed by the emergence and dominance of global neoliberalism this book locates Chinese sf as part of a world literature that is concerned with class inequality exploitative capitalism and the ways in which new technology contributes to these problems For those interested in the state of contemporary Chinese sf and its scholarship this book also provides a review of recent developments as well as emerging trends Its thematic chapters are organized in terms of different types of responses generated by techno power and techno nationalism sf that addresses traditional Chinese culture and myth sf that ruminates on the way China wields power internally and externally sf that considers global concerns in terms of Chinese responsibility and finally sf that critiques authoritarianism and censorship Heinemann New Wave Readers.
