and Peace**

New Rubian Revolution:

What Justice Demands Elan Journo, 2018-06-12 In this book Elan Journo explains the essential nature of the conflict and what has fueled it for so long What justice demands he shows is that we evaluate both adversaries and America's approach to the conflict according to a universal moral ideal individual liberty From that secular moral framework the book analyzes the conflict examines major Palestinian grievances and Israel's character as a nation and explains what's at stake for everyone who values human life freedom and progress What Justice Demands shows us why America should be strongly supportive of freedom and freedom seekers but in this conflict and across the Middle East it hasn't been much to our detriment

Edgar Rubin and Psychology in Denmark Jörgen L. Pind, 2013-08-13 Edgar Rubin was one of the outstanding pioneers of perceptual psychology in the early twentieth century His approach involved a turning away from an earlier elementaristic psychology towards an approach based on perceptual wholes Rubin's approach is closely linked to the Gestalt revolution in perceptual psychology and was eagerly embraced by the Gestaltists This has often led to Rubin being classified as a Gestalt psychologist This misrepresents his position as is shown in the book Rubin's aim was to develop a descriptive psychology or aspective psychology to use his terminology which would do full justice to the complex nature of psychological phenomena Thus he rejected attempts by the Gestalt psychologists to explain diverse phenomena within a single overarching framework While Rubin is internationally often misclassified as a Gestalt psychologist in Denmark he is often hailed as a pioneer of a specific Danish school of phenomenology This also misrepresents Rubin's approach who was highly critical of psychological schools His criticisms of the overambitious theoretical aspirations of Gestalt psychology his negative attitude towards school formation in psychology were both highly prescient What remains today of Gestalt psychology is primarily its descriptive parts the idea of schools of psychology so common in early twentieth century psychology is now seen as a totally outmoded viewpoint There is an interesting moral in this story for the history and status of psychology to wit that Rubin's emphasis on the correct description of psychological phenomena shows what is likely to live on as classic contributions to psychology This certainly holds for his own work on figure and ground which after almost a century is still universally known and admired by psychologists He was indeed a consummate psychological observer The book argues for the importance of description in psychology

Point of No Return Geoffrey Kemp, Jeremy Pressman, 1997 The study reviews the progress made toward Arab Israeli peace between 1991 and 1995 and the dramatic setbacks that occurred in 1996 It also assesses the challenges ahead and provides a country by country analysis of criticisms of the peace process
