New Waterscapes:

New Waterscapes Herbert Dreiseitl,Dieter Grau,2012-10-02 This third revised edition of best selling Waterscapes reveals the wide variety of possibilities for using water as a creative element in the city in the landscape and architecture The works encompass large scale masterplans urban parks river restorations but also interior design schemes and art objects

New Waterscapes Herbert Dreiseitl,Dieter Grau,2009 Waterscapes Amita Baviskar,2007 Contributed articles with reference to India The International Handbook of Political Ecology Raymond L Bryant,2015-08-28 The International Handbook of Political Ecology features chapters by leading scholars from around the world in a unique collection exploring the multi disciplinary field of political ecology This landmark volume canvasses key developments topics iss The Power of Urban Water Nicola Chiarenza,Annette Haug,Ulrich Müller,2020-05-05 Water is a global resource for modern societies and water was a global resource for pre modern societies The many different water systems serving processes of urbanisation and urban life in ancient times and the Middle Ages have hardly been researched until now The numerous contributions to this volume pose questions such as what the basic cultural significance of water was the power of water in the town and for the town from different points of view Symbolic aesthetic and cult aspects are taken up as is the role of water in politics society and economy in daily life but also in processes of urban planning or in urban neighbourhoods Not least the dangers of polluted water or of flooding presented a challenge to urban society The contributions in this volume draw attention to the complex manifold relations between water and human beings This collection presents the results of an international conference in Kiel in 2018 It is directed towards both scholars in ancient and mediaeval studies and all those interested in the diversity of water systems in urban space in ancient and mediaeval times

Water Insecurity and Water Governance

in Urban Kenya Anindita Sarkar,2022-10-22 This book explores water service provisions of the urban poor in the cities of Africa with particular emphasis on Kenya and its capital city of Nairobi In particular the book addresses the insecurity of tenure and how the colonial segregation of land continues to shape water access and service provision even today in Nairobi The book seeks to understand how urban water management entails the production of thirst among the urban poor and documents how cultural norms political commitments and seemingly mundane practices of water managers combine to exclude the poor from accessing water Supporters of privatization argue that private companies may succeed where governments have failed in supplying water to the urban poor The author takes a closer look at this argument demonstrating the limitations of some of the current reforms whilst also exploring alternatives and solutions This book will be an invaluable reference for students researchers and practitioners working in this field Basics Water Cycles Doris Haas-Arndt,2017-05-22 The integration of building services is an important aspect of architectural planning The conceptual design of supply systems and cycles within the building demands a solid grasp of the relationships that underpin the supply and disposal of the element water The focus here is on relations among the individual elements of the cycle from the supply

of drinking water consumers inside the building and the disposal of wastewater to the rehabilitation of wastewater The subject of water conservation is present throughout as an overarching framework Topics Requirements for drinking water Supply connections and distribution networks in the building Wastewater disposal and use Dealing with rainwater Resource friendly approaches **Divided Environments** Jan Selby,Gabrielle Daoust,Clemens Hoffmann,2022-09-22 What are the implications of climate change for twenty first century conflict and security Rising temperatures it is often said will bring increased drought more famine heightened social vulnerability and large scale political and violent conflict indeed many claim that this future is already with us Divided Environments however shows that this is mistaken Focusing especially on the links between climate change water and security and drawing on detailed evidence from Israel Palestine Syria Sudan and elsewhere it shows both that mainstream environmental security narratives are misleading and that the actual security implications of climate change are very different from how they are often imagined Addressing themes as wide ranging as the politics of droughts the contradictions of capitalist development and the role of racism in environmental change while simultaneously articulating an original international political ecology approach to the study of socio environmental conflicts Divided Environments offers a new and important interpretation of our planetary future
