Debus,2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century The Scientific American Book of Dinosaurs Gregory Paul,2003-04-22 Collects writings by experts in paleontology from John Horner on dinosaur families to Robert Bakker on the latest wave of fossil discoveries The New Dinosaurs ,2025-07-28 Thus begins a beguiling voyage of evolutionary discovery encompassing both geology and palaeontology as scientist and father of speculative evolution Dougal Dixon takes the reader on a journey around a strange new world where the dinosaurs have spread into every corner of the globe Dixon s remarkable vision of the creatures that could have evolved to live on is both awe inspiring and educational Learn about the dangerous Northclaws track gargantuan flightless Trombles across bleak tundra meet the cunning Springe of the swamps and marvel at the lightning fast Sprintosaurs Dougal Dixon s potent blend of up to date science and inventive fantasy given life by superbly detailed colour illustrations has produced a highly convincing alternative zoology and a wonderful modern array of New Dinosaurs **Dinosaurs** Dr. Thomas R. Jerald D. Harris, 2004-03 Children who love these fabulous creatures and what kid doesn't will be delighted to find more than just the same old dinos in this super collection of 35 plus saurus dot to dots. Instead of just the familiar Diplodocus Triceratops and Tyrannosaurus the species here include the Achelousaurus with rough bumpy knobs on its nose and over its eyes the Eotyrannus or Dawn Tyrant one of the earliest ancestors of the giant meat eating tyrannosaurs and the Neimongosaurus whose fossils were recently found in China. Accompanying each dot to dot are facts on the dinosaur's name size when and where it lived and more. Best of all when kids have finished connecting the dots they can take their crayons and color in the pictures however they like because no one knows what colors these animals really were. Batenburg, B.T. Huber, G.D. Price, N. Thibault, M. Wagreich, I. Walaszczyk, 2025-04-02 The Cretaceous was first mentioned in the legend of a geological map largely centred on France published in 1822 by Jean Baptiste Julien d'Omalius d'Halloy. Two hundred years of research have demonstrated that the Cretaceous records some of the highest sea levels atmospheric temperatures and extreme events in Earth history. It was also a time of significant palaeogeographical changes and continental fragmentation. This volume draws together a collection of papers that demonstrate these particularly Cretaceous events of warm climates sea level change and the impact of major volcanic events on the fauna and flora of the time. Geochemical and stable isotope data are used to interpret these changing environments and their impact on the Cretaceous ecosystem. The volume closes with a description of the recent drilling of the Chicxulub bolide impact site. *New Dinos* Shelley Tanaka, 2003 Describes some of the newly discovered dinosaurs and what paleontologists have learned about these prehistoric creatures in recent years. Dinosaurs Spencer G. Lucas, 2000 This text is intended for a one quarter or one semester introductory course on dinosaurs. It is a book that introduces dinosaur biology geology and the history of their discovery. It is a text that presents facts together with current ideas notions and controversies. Dr. Lucas presents dinosaurs as successful living creatures that were merely different in appearance from animals living today. The book is designed to be understood by students with little scientific background as it teaches students not only how to use scientific methods but how to synthesize data to create their own ideas. *Fossilium Catalogus*, 1926 **New Dinosaur Discoveries A-Z** William Stout, 2009 Introduces dinosaurs for every letter of the alphabet from Amargasaurus to Zuniceratops discussing their diet physical characteristics and behavior. *Osteology*
