**Fragments of a Mortal Mind** Donald Anderson,2021-04-06 We are where we've been and what we've read aren't we Where else do we get the experience we need to evocatively live At once a memoir a reading journal and a novel Fragments of a Mortal Mind is a daring contemporary commonplace book Donald Anderson critically acclaimed author of Gathering Noise from My Life and Below Freezing shows us how the disparate elements of our lives collect to construct our deepest selves and help us to make sense of it all Anderson layers his personal experiences and reflections with those of others who have wrestled with inner and outer social cultural and political memories that are not as accurate as history might suggest but that each of us believe nonetheless He challenges the reader's sense of memory and fact downplaying the latter in explaining how each of us crafts our own personal histories As Anderson weaves his voice among numerous other voices and ideas that rest upon other ideas we are faced with larger issues of human existence war memory trauma mortality religion fear joy ugliness and occasional beauty What we have here is a meditation on living in America We are shown how the world we consume becomes us as we metabolize it How we as humans through our own fragments of memories influences and experiences become our true selves

By charting fragments of thoughts over a lifetime Anderson exposes a way of thinking and perceiving the world that is refreshingly intuitive and desperately needed *Fragments of a Mortal Mind* is a powerful masterpiece that closely resembles our lived experiences and is a vivid reflection of our time

**English Romanticism and Modern Fiction** Allan Richard Chavkin, 1993 The essential premise of this book is that there is a continuity from the English romantic era to our own To understand properly some important twentieth century writers of fiction one must understand their connection with romanticism To avoid this connection is to risk simplification or distortion of view about some major contemporaries Scholars have established in general terms that romanticism marked a watershed in the early nineteenth century and then continued in subsequent years to shape the sensibilities of some important modern writers especially twentieth century poets Yet the explicit connection has been ignored and the essayists in this collection seek to demonstrate the impact of romanticism on six twentieth century fictionists In his introduction Allan Chavkin writes that we are still suffering from a warped view of twentieth century literature as a result of a lingering anti romantic prejudice of T S Eliot Ezra Pound and the Imagists who in their zeal to revitalize a literature stagnating in late Victorian imitation romanticism caricatured romanticism as softminded This collection of essays will help correct this distorted view by showing the centrality of English romanticism to modern fiction [The New York Times Index](#), 2003
