Parallel Computing For Realtime Signal Processing And Control:

Parallel Computing for Real-time Signal Processing and Control M. Osman Tokhi,M. Alamgir Hossain,M. Hasan Shaheed,2012-12-06 Although the computing demands of real time signal processing and control applications are increasing rapidly parallel processors permit several instructions to be dealt with simultaneously so that the real time needed is manageable This book introduces the advantages of this strategy and details how to use parallel processing to deal with common signal processing and control algorithms It emphasises the relationship between the computing requirements of algorithms and the appropriate choice of architectures while demonstrating how to identify processor capabilities and how to exploit them to the fullest The text includes examples and end of chapter exercises to facilitate self and group study and case studies to put theoretical concepts into a practical context For advanced students in parallel computing control and signal processing disciplines it is an invaluable tool in learning to get the most from their computer systems

High-performance Parallel Computing for Real-time Signal Processing and Control José Miguel Martínez Villaseñor,2006 **Applied Computing** Suresh Manandhar,Jim Austin,Uday Desai,Yoshio Oyanagi,Asoke Talukder,2005-01-11 The focus of the Asian Applied Computing Conference AACC is primarily to bring the research in computer science closer to practical applications The conference is aimed primarily at topics that have immediate practical benefits By hosting the conference in the developing nations in Asia we aim to provide a forum for engaging both the academic and the commercial sectors in that region The first conference Information Technology Prospects and Challenges was held in May 2003 in Kathmandu Nepal This year the conference name was changed to Asian Applied Computing Conference to reflect both the regional and the application oriented nature of the conference AACC is planned to be a themed conference with a primary focus on a small set of topics although other relevant applied topics will be considered The theme in AACC 2004 was on the following topics systems and architectures mobile and ubiquitous computing soft computing man machine interfaces and innovative applications for the developing world AACC 2004 attracted 184 paper submissions from around the world making the reviewing and the selection process tough and time consuming The selected papers covered a wide range of topics genetic algorithms and soft computing scheduling optimization and constraint solving neural networks and support vector machines natural language processing and information retrieval speech and signal processing networks and mobile computing parallel grid and high performance computing innovative applications for the developing world cryptography and security and machine learning Papers were primarily judged on originality presentation relevance and quality of work Papers that had clearly demonstrated results were given preference **Scientific and Technical Aerospace Reports** ,1992 **Advances In Climbing And Walking Robots - Proceedings Of 10th International Conference (Clawar 2007)** Ming Xie,Steven Dubowsky,Jean-guy Fontaine,Mohammad Osman Tokhi,Gurvinder S Virk,2007-07-11 Robotics is an exciting field in engineering and natural sciences Robotics has already

made a significant contribution to many industries with the widespread use of industrial robots for tasks such as assembly welding painting and handling materials In parallel we have witnessed the emergence of special robots which can undertake assistive jobs such as search and rescue de mining surveillance exploration and security functions Indeed the interest in mobile machines such as climbing and walking robots has broadened the scope of investigation in robotics This volume covers broad topics related to mobile machines in general and climbing and walking robots in particular Papers from the following keynote speakers are included Heinz Worn University of Karlsruhe Germany Atsuo Takanishi University of Waseda Japan John Billingsley University of Southern Queensland Australia Bryan Bridge London South Bank University UK and Neville Hogan Massachusetts Institute of Technology USA *Real Time Signal Processing X* J.
