## **Parallel Program Design A Foundation:**

*Parallel program design* Kanianthra Mani Chandy, Jayadev Misra, 1988      FST TCS 2003: Foundations of Software Technology and Theoretical Computer Science Paritosh K Pandya, Jaikumar Radhakrishnan, 2003-11-24 This book constitutes the refereed proceedings of the 23rd Conference on Foundations of Software Technology and Theoretical Computer Science FST TCS 2003 held in Mumbai India in December 2003 The 23 revised full papers presented together with 4 invited papers and the abstract of an invited paper were carefully reviewed and selected from 160 submissions A broad variety of current topics from the theory of computing are addressed ranging from algorithmics and discrete mathematics to logics and programming theory      **Foundations of Software Technology and Theoretical Computer Science** P.S. Thiagarajan, 1994-11-23 This volume presents the proceedings of the 14th International Conference on the Foundations of Software Technology and Theoretical Computer Science FST TCS 14 held in Madras India in December 1994 Besides the five invited papers by well known researchers it includes 31 full refereed research papers selected out of a total of 140 submissions The papers contribute to the whole area of theoretical computer science with an emphasis on algorithms and complexity Other topics covered are program semantics program verification formal logic computational geometry concurrency unification and discrete mathematics      Foundations of Quantum Programming Mingsheng Ying, 2024-04-29 Quantum computers promise dramatic advantages in processing speed over currently available computer systems Quantum computing offers great promise in a wide variety of computing and scientific research including Quantum cryptography machine learning computational biology renewable energy computer aided drug design generative chemistry and any scientific or enterprise application that requires computation speed or reach beyond the limits of current conventional computer systems Foundations of Quantum Programming Second Edition discusses how programming methodologies and technologies developed for current computers can be extended for quantum computers along with new programming methodologies and technologies that can effectively exploit the unique power of quantum computing The Second Edition includes two new chapters describing programming models and methodologies for parallel and distributed quantum computers The author has also included two new chapters to introduce Quantum Machine Learning and its programming models parameterized and differential quantum programming In addition the First Edition's preliminaries chapter has been split into three chapters with two sections for quantum Turing machines and random access stored program machines added to give the reader a more complete picture of quantum computational models Finally several other new techniques are introduced in the Second Edition including invariants of quantum programs and their generation algorithms and abstract interpretation of quantum programs Demystifies the theory of quantum programming using a step by step approach Includes methodologies techniques and tools for the development analysis and verification of quantum programs and quantum cryptographic protocols Covers the interdisciplinary nature of quantum programming by providing preliminaries from

quantum mechanics mathematics and computer science and pointing out its potential applications to quantum engineering and physics Presents a coherent and self contained treatment that will be valuable for academic and industrial researchers and developers Adds new developments such as parallel and distributed quantum programming and introduces several new program analysis techniques such as invariants generation and abstract interpretation      *Foundations of Software Technology and Theoretical Computer Science* Kesav V. Nori,1987-11-25 This volume gives the proceedings of the Tenth Conference on Foundations of Software Technology and Theoretical Computer Science These conferences are organized and run by the computer science research community in India and their purpose is to provide a forum for professional interaction between members of this research community and their counterparts in different parts of the world The volume includes four invited papers on reasoning about linear constraints using parametric queries the parallel evaluation of classes of circuits a theory of commonsense visual reasoning natural language processing complexity theory and logic The 26 submitted papers are organized into sections on logic automata and formal languages theory of programming parallel algorithms geometric algorithms concurrency distributed computing and semantics      *Foundations of Component-Based Systems* Gary T. Leavens,Murali Sitaraman,2000-03-28 This collection of articles by well known experts was originally published in 2000 and is intended for researchers in computer science practitioners of formal methods and computer programmers working in safety critical applications or in the technology of component based systems The work brings together several elements of this area that were fast becoming the focus of much research and practice in computing The introduction by Clemens Szyperski gives a snapshot of research in the field About half the articles deal with theoretical frameworks models and systems of notation the rest of the book concentrates on case studies by researchers who have built prototype systems and present findings on architectures verification The emphasis is on advances in the technological infrastructure of component based systems how to design and specify reusable components and how to reason about verify and validate systems from components Thus the book shows how theory might move into practice      **Foundations of Programming Languages** Seyed H. Roosta,2002 This text presents topics relating to the design and implementation of programming languages as fundamental skills that all computer scientists should possess Rather than provide a feature by feature examination of programming languages the author discusses programming languages organized by concepts      **Algebra, Meaning, and Computation** Kokichi Futatsugi,2006-06-22 This volume honoring the computer science pioneer Joseph Goguen on his 65th Birthday includes 32 refereed papers by leading researchers in areas spanned by Goguen s work The papers address a variety of topics from meaning meta logic specification and composition behavior and formal languages as well as models deduction and computation by key members of the research community in computer science and other fields connected with Joseph Goguen s work      *VDM '91. Formal Software Development Methods. 4th International Symposium of VDM Europe, Noordwijkerhout, The Netherlands, October 21-25, 1991. Proceedings* Søren Prehn,W. J. Toetenel,1991 The proceedings of

the fourth Vienna Development Method Symposium VDM 91 are published here in two volumes Previous VDM symposia were held in 1987 LNCS 252 1988 LNCS 328 and 1990 LNCS 428 The VDM symposia have been organized by VDM Europe formed in 1985 as an advisory board sponsored by the Commission of the European Communities The VDM Europe working group consisted of researchers software engineers and programmers all interested in promoting the industrial usage of formal methods for software development The fourth VDM symposium presented not only VDM but also a large number of other methods for formal software development Volume 1 contains conference contributions It has four parts contributions of invited speakers papers project reports and tools demonstration abstracts The emphasis is on methods and calculi for development verification and verification tools support experiences from doing developments and the associated theoretical problems Volume 2 contains four introductory tutorials on LARCH Refinement Calculus VDM and RAISE and four advanced tutorials on ABEL PROSPECTRA The B Method and The Stack They present a comprehensive account of the state of the art

**Foundations of Software Technology and Theoretical Computer Science**, 1994      **TAPSOFT '93** Marie-Claude Gaudel, Jean-Pierre Jouannaud, 1993 This volume contains the proceedings of the fourth International Joint Conference on the Theory and Practice of Software Development TAPSOFT 93 Since the first in 1985 the aim of these conferences has been to bring together theoretical computer scientists and researchers in software engineering with a view to discussing how formal methods can usefully be applied in software development TAPSOFT 93 consists of three parts an advanced seminar the Colloquium on Trees in Algebra and Programming CAAP and the Colloquium on Formal Approaches of Software Engineering FASE The advanced seminar includes four invited surveys and four invited conferences The selected papers for CAAP are organized in seven sessions specifications and proofs concurrency automata and counting constraints solving rewriting logic and trees analysis of algorithms and a common session with FASE on type inference The selected papers for FASE are presented in eight sessions case studies in formal design and development compositionality modules and development formal development foundations and analysis of formal specifications verification of concurrent systems model checking parallel calculus and a common session with CAAP on type inference PUBLISHER'S WEBSITE      Rewriting Techniques and Applications, 1993      **A Classical Mind** A. W. Roscoe, Charles Antony Richard Hoare, 1994 To celebrate the 60th birthday and the achievement of C. A. R. Hoare a rich assembly of contributors have pulled together to provide a volume of essays which are dedicated to Tony Hoare and his approach to Computer Science Recognizing the huge difference that Tony has made to the way that computing is perceived each contributor has a very personal way of expressing their respect for his commitment and enterprise To be included with the Hoare Computer Science Series Reads like a who's who of computing each paper written by a key person in the field Niche market but has the ability to appeal to a wide range of lecturers students librarians
