Parents In Control:

The Psychology of Parental Control Wendy S. Grolnick, 2002-12-18 What is parental control Is it positive or negative for children What makes parents controlling with their children even when they value supporting children's autonomy Are there alternatives to control and how might we apply them in important domains of children's lives such as school and sports This book addresses these and other questions about the meaning and predictors of parental control as well as its consequences for children's adjustment and well being While the topic of parental control is not new there has been controversy about the concept with some researchers and clinicians weighing in on the side of control and others against it This book argues that part of the controversy stems from different uses of the term with some investigators focusing more on parents being in control and others on controlling children Using a definition of control as pressure for children to think feel or behave in specific ways the author explores research on parental control arguing that there is more consensus than previously thought Using this research base the author provides evidence that parental control can be subtle and can lurk within many positive parenting approaches parental control undermines the very behaviors we wish to inculcate in our children providing autonomy support the opposite of control is a challenge even when parents are committed to doing so With controversy in the literature about parental control and attention in the media on the ways in which parents step over the control line e g screaming on the soccer sidelines pressuring children in academics this book is especially timely It provides an empathic view of how easily parents can become trapped in controlling styles by emphasizing performance and hooking their own self esteem on children's performance Examples of how this can happen in academic sporting and peer situations with their emphasis on competition and hierarchy are provided as well as strategies for parenting in highly involved but autonomy supportive ways A highly readable yet research based treatment of the topic of parental control this book explores the controversial topic of parental control addresses controversy about the positive and negative effects of parental control and disentangles various parenting concepts such as involvement structure and control illustrates how control can be overt such as in the use of corporal punishment or covert as in the use of controlling praise provides evidence that control may produce compliance in children preventing them from initiating and taking responsibility for their own behavior explores why parents are controlling with their children including environmental and economic stresses and strains characteristics of children that pull for control and factors in parents own psychologies that lead them to be hooked on children's performance and provides examples of control in the areas of academics and sports the hierarchical and competitive nature of these domains is seen as contributing to parents tendencies to become controlling in these areas *Parenting Your Out-of-control Child* George M. Brown,2016-10-01 Power struggles between parents and teens are nothing new we re all familiar with the image of kids and parents locked in a battle for control but what really drives these conflicts According to the author psychotherapist Neil Brown these struggles occur because the family control dynamic is dysfunctional Chock full of easy to use evidence based tools this book will help parents and teens overcome chronic conflict and foster a peaceful and loving home environment **Losing Control & Liking it** Timothy L. Sanford,2008-12-22 It s been drummed into parents heads that they have to make their kids turn out right Sanford shows parents how to give up the fears about their teenager s future and discover the truth about how God parents his children **Combined Parent-Child Cognitive Behavioral Therapy** Melissa K. Runyon,Esther Deblinger,2013-09-19 Violence is an epidemic that negatively impacts children across their lifespan Reports indicate 2 1 million youth have experienced physical abuse during their lifetimes disrupting the healthy development of children from the toddler years

through adolescence and most cases involve parents. Some parents lack the skills to effectively parent and use physical discipline as a strategy to control their children's problem behaviors. They may use increasing force if children continue to be noncompliant, which places many children at risk for harm. Combined Parent Child Cognitive Behavioral Therapy (CPC CBT), created by Melissa K. Runyon and Esther Deblinger and outlined in this guide, provides an evidence-based intervention aimed at empowering families to develop optimistic outlooks on parenting and peaceful home environments and to decrease stress experienced both by parents and children. CPC CBT incorporates elements from empirically supported CBT models for families who have experienced physical abuse, sexual abuse, and domestic violence. Additionally, CPC CBT draws on concepts from developmental theory, learning theory, family systems theory, and motivational interviewing. The target population includes children ages 3-17 years and their parents/caregivers who have already engaged in or are at risk for physically abusive behavior towards their children. This manual is for clinicians, clinical supervisors, administrators, and others who are considering the implementation of CPC CBT in their agencies with families at risk for child physical abuse. **Back in**

Control Gregory Bodenhamer, 1984-02-15. In just thirty days you can get children to behave the way you want them to. Whether their misbehavior is as minor as letting the dishes pile up and the trash overflow or as traumatic as a drug habit and stealing, **Back in Control** will enable you to set and enforce rules that your kids will obey. **Back in Control** is based on a highly successful program that has helped thousands of parents regain control over their children. Without compromising your values away or kicking the kids out of the house, it offers you the simplest, most effective method of childhood discipline to date. It presents a three-step formula that is perfect for virtually any adult wanting to control children's misbehavior. Instead of getting caught up in children's arguments and manipulations, **Back in Control** shows parents how to reestablish their rightful place as bosses of the family. Teachers are able to devote more time to teaching than to disciplining students. Probation officers and social workers working with parents in addition to managing their caseloads more effectively are able to permanently stop children from abusing drugs or alcohol, stealing, running away from home, and being truant. Children themselves learn that there are some rules they must obey, whether they want to or not, and they will grow up believing that they can succeed in doing what is required of them. Power belongs to those who use it. And if you don't, your children will. If your children's problem behavior is out of hand, it's time you got **Back in Control**. **Psychopathology Among Youth in**

Parents Julie Poehlmann,J. M. Eddy,Patricia J. Bauer,2013-07-10 Children with incarcerated parents are at risk for a variety of problematic outcomes yet research has rarely examined protective factors or resilience processes that might mitigate such risk in this population In this volume we present findings from fi ve new studies that focus on child or family level resilience processes in children with parents currently or recently incarcerated in jail or prison In the fi rst study empathic responding is examined as a protective factor against aggressive peer relations for 210 elementary school age children of incarcerated parents The second study further examines socially aggressive behaviors with peers with a focus on teasing and bullying in a sample of 61 children of incarcerated mothers Emotion regulation is examined as a possible protective factor The third study contrasts children s placement with maternal grandmothers versus other caregivers in a sample of 138 mothers incarcerated in a medium security state prison The relation between a history of positive attachments between mothers and grandmothers and the current cocaregiving alliance are of particular interest The fourth study examines coparenting communication in

depth on the basis of observations of 13 families with young children whose mothers were recently released from jail Finally in the fifth study the proximal impacts of a parent management training intervention on individual functioning and family relationships are investigated in a diverse sample of 359 imprisoned mothers and fathers Taken together these studies further our understanding of resilience processes in children of incarcerated parents and their families and set the groundwork for further research on child development and family resilience within the context of parental involvement in the criminal justice system
